ANNUAL INDEX
Journal of Chemical Education
Volume 46, 1969

The annual index for Volume 46 of the Journal of Chemical Education is divided into several parts. Authors are listed in two sections: authors of articles and books reviewed. The subject index includes both subjects and titles to articles; the books reviewed are listed in a separate section. The principal subject entries are distinguished from the titles by printing the former in italics. Portraits are indicated by (P), letters to the editor by (L), errata by (E). Articles included under special series are indicated in the regular index by: TE, Textbook Errors; TD, Tested Demonstrations; PO, Provocative Opinion; TOPS, Tested Overhead Projection Series; Safety, Safety in the Chemical Laboratory; Chem. Inst., Topics in Chemical Instrumentation; IC, Industrial Chemistry; RS, Research Summaries; and TA, Teaching Aids.

Author Index

Abernethy, John Leo. The historical and current interest in coumarin. 561, 856 (E)
Aikens, David A.—*See* Baron, Bill N.
Alberty, Robert A. Thermodynamics of the hydrolysis of adenosine triphosphate. 713
Alexander, Guy B. Tantalum recovery by liquid-liquid extraction (Indus. Chem.). 157
Alhadeff, Ezra S. An applicator for preparative tlc. 249
Alix, Ernest C. A convenient stencil for glass etching. 863
Allred, Ronald E.—*See* Hansen, Lee D.
Alwitt, R. S.—*See* Vijh, A. K.
Alyea, Hubert. Tested overhead projection series—*See* TOPS.
Aren, Kerstin—*See* Dyrssen, David
Aronson, John N. Simple developing chamber for thin layer chromatography. 483
Ashworth, Raymond B.—*See* Brewer, John M.
Atkinson, G. F. Analytical chemistry for honors applied chemistry students. 519
—and **Shaw, John H.** Apparatus for electrodeposition experiments. 387
Ault, Addison, and **Kopet, Rachel.** Preparation of adamantane: An introductory organic experiment. 612
—and **Kraig, Raymond.** Isotopic dilution analysis. Chloresterol in gallstones and caffein in tea, cola, and NoDoz. 767

Bada, Jeffrey L. The pK_a of a weak acid as a function of temperature and ionic strength: An experiment using a *p*H meter. 689
Bader, Morris. A computerized physical chemistry experiment. 206
Bailey, R. A., El-Guindy, M., Tangredi, W., and **Walden, J. A.** Safety shut-off for water-cooled devices. 30
Balasubramaniyan, V.—*See* Blatz, Paul.
Ball, M. C. Chemical transport and zirconium (L). 185
Bard, James R. A combustion-gas chromatography experiment. 441
Barnard, W. Robert. Microforms in chemical education (TA). 254
—and **Schrage, Samuel.** Films for chemical education (TA). 325
—and **Tressel, George.** Advanced film-TV production techniques (TA) Part I, lighting. 461
Barnes, James W., Bedenbaugh, John H., and **Brown, Fred W.** The use of "programmed lectures" in freshman chemistry. 622
Baron, Bill N., and **Aikens, David A.** Induced redox reactions: An experiment for introductory analytical laboratory. 246
Barr, C. R., and **Mackey, J. L.** The chemistry curriculum and the January term. 653
Bates, Alvin C.—*See* Smith, Richard F.
Battino, Rubin. Chemistry and the sense of wonder. 38
Behnke, George T.—*See* Brubaker, George R.
Belloli, Robert. Resolution and stereochemistry of asymmetr silicon, germanium, tin, and lead compounds. 640
Bengelsdorf, Irving S. The adventures of Janus in Mass-Media Land. 543
Benson, John E., and **Garten, Robert L.** A strong and inexpensive glass-to-metal seal. 766
Bent, H. E.—*See* Conrad, C. R.
Bergthorsson, Bjorn. Uncertainty (Principle) (L). 186
Berline, Steven and **Bricker, Clark.** The law of mass action. 499
Berndt, Alan F. Binary phase diagrams (TE). 594
Bernett, William A. Localized and delocalized molecular orbital description of methane. 746
Beste, Lawrence F. The polynomial method of quantum chemistry: An introduction. 151
Beyerle, Elmer B.—See Haynes, LeRoy W.
Bigelow, M. Jerome. The structure of solid aluminum chloride (TE). 495
—Thermochemistry of hypochlorite oxidations. 378
Bissey, Jack E. Friday experiments (PR). 497
Blake, J. A., Burns, George, and **Chang, S. K.** Flash photolysis studies of iodine atom recombination. 745
Blank, Zvi—*See* Speyer, Daniel M.
Blatz, Paul, Pippert, David, Sherman, Larry, and **Balasubramaniyan, V.** Carbonium ions of conjugated molecules: A physical organic experiment. 512
Blijleven, H. A.—*See* Gelsema, W. J.
Blumberg, Avrom A., and **Ilagen, Perlita.** Diffusion cell for optically-active molecules and thin membranes. 238
Bogue, J. Yule. Drugs of the future (CACT). 468
Bosch, Arthur J. The resolution of DL-histidine: An organic chemistry experiment using an ion exchange resin. 691
Bowerman, E. W., Harris, P. M., Krubsack, A. J., Schram, E. P., and **Sweet, T. R.** Safety handbook, Chemistry Department, Ohio State University. Safety manuals and handbooks (Safety). A597
Brabson, G. Dana. Nmr analysis of water-acetic acid solutions. 754
Brady, Leonard E. A superior method of mulling samples for infrared spectroscopy. 301
—and **Wozny, John.** A quick-mounting sample holder for infrared work. 272
Bragin, J., and **Harris, W. C.** A simple, inexpensive recorder pen. 850
Brainard, Alan J. The mathematical behavior of extensive and intensive properties of simple systems. 104
Brasted, Robert C. Report on the tenth Latin American Chemical Congress. 251
Braun, Charles L.—*See* Kuhlmann, Karl F.
Braunstein, Jerry. States, indistinguishability, and the formula $S = k \ln W$ in thermodynamics. 719
Brenner, R. J.—*See* Duff, J. G.
Brenner, Walter—*See* Speyer, Daniel M.
Brewer, John M., and **Ashworth, Raymond B.** Disc electrophoresis. 41
Bricker, Clark—*See* Berline, Steven.

Bridgman, Wilbur B. Calculation of Madelung constants by direct summation. 592
Briggs, A. G. High school courses (L). 700
Brown, Oliver L. An improved equivalent weight apparatus. 617
Brubaker, George R., and **Behnke, George T.** A convenient device for dispensing solid samples in teaching laboratories. 318
Brumfitt, G. Correlation between ligand field theory and complex dissociation: A kinetics experiment. 250
Bryan, Ashley M., and **Olafsson, Patrick G.** Activation energy determination: An organic chemistry experiment. 248
Bulkin, Bernard. Raman spectroscopy (Chem. Inst.). A781, A859
Burger, Lawrence J., and **Taber, Richard L.** A simple, inexpensive shaking apparatus. 39
Burgess, A. E., and **Latham, J. L.** Kinetics of fast brominations: A potentiometric study. 370
Burns, George—*See* Blake, J. A.

Campbell, J. A., Nelson, Douglas, and **Rudesill, John.** A distribution experiment. 454
—and **Whiteker, R. A.** A periodic table based on potential-*p*H diagrams. 90
Carman, R. M., and **Evans, R. F.** Conversion of sucrose into a carboxylic acid: An undergraduate experiment. 847
Carraher, Charles, Jr. Reaction vessel with stirring and atmosphere controls. 314
Cartier, P. G.—*See* Zuehlke, R. W.
Cassidy, Harold G. A natural philosophy course in physics and chemistry. 64
Champion, William C.—*See* Taber, Richard L.
Chang, S. K.—*See* Blake, J. A.
Chapin, Douglas S.—*See* Linnell, Robert H.
Charles, R. G. A simple method for recording with a conventional analytical balance. 787
Chesick, John P. Subroutines for evaluation of integrals for student quantum chemistry calculations. 432
Chipman, Wilmon B. Molecular models. 118
Christeck, R. P.—*See* Rausch, G. W.
Clark, Paul V. Fused salt investigations needed (L). 329
Clarke, Michael J., and **Venezky, David L.** Teflon mixing vial for handling solids for infrared spectroscopy. 19
Clement, G.—*See* Norcross, B. E.
Cohen, Irwin, and **Del Bene, Janet.** Hybrid orbitals in molecular orbital theory. 487
Collins, Kenneth E. A convenient glass-to-glass connector. 179
Conard, C. R., and **Bent, H. E.** A jig for making styrofoam molecular models. 492
—Diffusion of potassium permanganate as a lecture demonstration. 758
Cook, William B. Division of Chemical Education: Communication from the chairman. 197
Cooper, J. N., and **Ramette, R. W.** The oxidation of hydrazine by basic iodine solutions: A stoichiometric study. 872
Copley, George Novello. Algebra and chemical equations (L). 699
Corio, P. L., and **Hirst, R. C.** Magnetic resonance spectra of multispin systems. 345
Cragg, G. M. L. Recent developments in the use or organoboranes in organic synthesis. 794
Craig, Norman C. Molecular symmetry models. 23
Crater, H. L., Macchione, J. B., Gemmill, W. J., and **Kramer, H. H.** Radioisotope generators for introductory laboratory use. 287
Crawford, David E.—*See* Johnson, Richard S.
Crocker, Roger. Answer to letter: **Copley, George Novello.** Algebra and chemical equations (L). 699
Cromwell, Norman H.—*See* Glaros, George.
Cronholm, L.—*See* Doyle, R. J.
Cropper, William H. Quantum mechanics with a little less mystery. 839
Cropper, William H., and **Stradling, Samuel S.** The load problem (PO). 31
Curran, David J. Pressure transducers (Chem. Inst.).
Part one. A401
Part two. A465

Danforth, J. D. Division of Chemical Education. Treasurer's report. 328
Darrow, Frank W. A sensitive solid state thermoregulator relay. 177
Daub, Guido H.—*See* Hansen, Lee D.
Daugherty, N. A. Prediction of molecular polarity by V.S.E.P.R. theory. 283
Dauphinee, G. A., and **Heit, M. L.** A versatile reagent for general chemistry. 660
Davenport, D. A. Baby bottles and elementary chemistry. 878
Davies, Mansel. Dielectric aspects of the hydrogen-bond interaction. 17
Deamer, David W. ATP synthesis: The current controversy. 198
de Groot, A., and **Hovius, K.** Apparatus for the addition of suspensions or solids to a reaction mixture. 498
DeJarlais, W. J. A simple safety device for unattended laboratory heating. 286
Delaney, C. M. Thermodynamic puzzle (L). 701
DeLap, James H. First semester qualitative analysis. 837
Del Bene, Janet—*See* Cohen, Irwin.
de Lorenzo, Hebe Coda, Frugoni, Juan A. Coch, and **Lopez, Valentin.** Cryoscopic measurement of the coordination number of copper(II). 113
DeMaré, G. R., Goldfinger, P., Huybrechts, G., Olbregts, J., and **Toth, M.** Kinetics of the gas phase pyrolysis of 1,1-dichloroethane: A physical chemistry experiment. 684
DeMattia, Dennis, Gruhn, Thomas, and **Gorman, Mel.** Indirect calorimetry by computer in the general chemistry course. 398
DePaz, M. A quantitative diffusion experiment. 784
De Rocco, Andrew G. Intermolecular potential and virial in fluids. 365
DeThomas, Anthony V., and **Pascual, Francis.** A "sandwich" apparatus for demonstrating radial chromatography. 319
Deutsch, J. L., and **Deutsch, E. W.** Computer graded qualitative analysis experiments. 649
—and **Poling, Stephen M.** The determination of paramagnetic susceptibility by nmr: A physical chemistry experiment. 167
Deverin, J.-A., and **Salzmann, J.-J.** Determination of the index of refraction: Two simple methods. 51
Dewhurst, F. Student experiments on the gel filtration of proteins. 864
Dinga, Gustav P. A computerized soda ash experiment for first-year college chemistry. 60
Dingledy, David P., and **Patrie, Laurence A.** Statistical evaluation of laboratory experiments. 119
Dolbier, William R., Jr. Organic chemistry (RS). 342
Donk, L.—*See* Gelsema, W. J.
Donohue, Jerry. A key to point group classification. 27
Douglas, Bodie E.—*See* Ho, Shih-Ming.
Doyle, R. J., and **Cronholm, L.** A model antigen-antibody system for classroom use. 868
Drake, G. Wilson—*See* Johnston, C. B.
Drake, Robert F. A simple method for the identification of borosilicate glass. 48
Dreisbach, Dale, *Editor.* Tested demonstrations—*See* Tested Demonstrations.
Drysdale, D. D., and **Lloyd, A. C.** Tables of conversion factors for reaction rate constants. 54
DuBose, Betsy—*See* Parks, A. O.
Duff, J. G., Yung, D. K., Brenner, R. J., Wilson, B. J., and **Racz, W. J.** Identification of carboxylic acids: Use of N-methylpiperazine and N-phenylpiperazine. 388
Duffy, Norman V., and **Walsh, Joseph H.** Videotaped help sessions in a freshman chemistry program. 392
Dunlop, Peter J.—*See* Martin, Maurice L.
Dyrssen, David, Ivanova, Elena, and **Aren, Kerstin.** The solubility curves for calcium and strontium sulfates. 252

Safety device for unattended heating. 286
Safety shut-off for water-cooled devices. 30
Sample holder for infrared work. 272
Sealing wires in glass. 121
Shaking. 39
Simple electrophoresis. 527
Simple vacuum monitor. 739
Solid state recording nanoammeter. 241
Solid state thermoregulator relay. 177
Source intensity compensation for fluorescence. 435
Spherical metal electrodes. 103
Spot plate. 56
Stencil for glass etching. 863
Teflon enclosed steel spiral as column packing. 464
Teflon mixing vial for ir. 458
Tester for a conductor. 354
Thermometer safety. 644
Transfer device for volatile liquids. 289, 701(L)
Transistorized power sources for coulometric titration. 858
Vacuum sublimation apparatus. 790
Vacuum system for freshman lab. 874
Vapor-liquid equilibria measurements. 820
Viscosity coefficients equipment. 781
Zone extractor for preparative thick-layer chromatography. 763
Apparatus, A "Sandwich," for demonstrating radial chromatography. **Anthony V. DeThomas** and **Francis Pascual.** 319
Apparatus, A semi-micro hot filtration. **Richard W. Kocon.** 516
Apparatus for electrodeposition experiments. **G. F. Atkinson** and **John H. Shaw.** 387
Apparatus for gas reactions, A simple. The decomposition of di-*t*-butyl peroxide. **A. F. Trotman-Dickenson.** 396
Apparatus for handling reactive liquids, An. **M. C. Waldman.** 364
Apparatus for the addition of suspensions or solids to a reaction mixture. **A. de Groot** and **K. Hovius.** 498
Apparatus for the purification and crystal growth of organic compounds. **C. C. Gravatt** and **Paul M. Gross.** 693
Application of a course in chemical literature to undergraduate research. **Earl Krakower.** 395
Applicator for preparative tlc, An. **Ezra S. Alhadeff.** 249
Applied research and development in the steel industry. 294
Aspirin, Saponification of, in dimethyl sulfoxide. **Joe A. Vinson** and **Edward K. Hocker.** 245
Astrophysics and biochemistry: An inquiry into the origins of hybrid sciences. **Aaron J. Ihde.** 193
Asymmetric silicon, germanium, tin, and lead compounds, Resolution and stereochemistry of. **Robert Belloli.** 640
Asymmetric structures, Wooden models of. **Martin J. Nye.** 175
Atmosphere, Stable isotopes of the. **C. F. Eck.** 706
Atmosphere, stirring and, controls, Reaction vessel with. **Charles Carraher, Jr.** 314
Atmospheric pressure from barometer readings. **G. F. Kinney.** 321
Atomic fluorescence, An instrument for source intensity compensation in. **T. C. O'Haver** and **J. D. Winefordner.** 435
ATP synthesis: The current controversy. **David W. Deamer.** 198
Audio aids in examination grading. **Alfred R. Pray.** 327
Automatic curve reading device, An. **K. C. O'Kane** and **N. B. Jurinski.** 460
Automation of organic elemental analysis. **Velmer B. Fish** (Chem. Inst.). A323
Avogadro's number by four methods. **W. H. Slabaugh.** 40
Avogadro's number from the volume of a monolayer, Determining. **Cornelius T. Moynihan** and **Harold Goldwhite.** 779
Awards
1970 Conant award recipients. 712
Dexter award to Aaron Ihde. 193
James T. Grady award address. 543
1969 MCA award recipients. 379
SAMA award address. 540
Azobenzene, The photoisomerization of. A tlc experiment for the undergraduate organic laboratory. **Jerry F. Janssen.** 117
Azo chemistry, A new approach to: Oxidative coupling. **S. Hunig.** 734

Baby-bottles and elementary chemistry. **D. A. Davenport.** 878
Balance, conventional analytical, A simple method for recording with a. **R. G. Charles.** 787
Bandwidth, constant, recording nanoammeter, A versatile, solid state. **T. C. O'Haver** and **J. D. Winefordner.** 241
Barium and hydrocarbon danger. Accident case histories (Safety). A32
Barnard, W. Robert (P). 254
Barometer readings, Atmospheric pressure from. **G. F. Kinney.** 321
Basic alumina, Reactions on. **Félix Serratosa.** 302
Behavior of partial molar quantities at high dilution. **J. E. Garrod** and **Thelma M. Harrington** (TE). 165
Benzhydryl bromide, Determination of the rate of solvolysis of. An nmr experiment. **Ian Horman** and **Michael J. Strauss.** 114
Beryllium, An historical note on. **Henry Gilman.** 276
Binary phase diagrams. **Alan F. Berndt** (TE). 594
Biochemistry
Antigen-antibody system. 868
ATP synthesis. 198
Composite pK's of cysteine (TE). 239
Disc electrophoresis. 41
Disposable macromolecular model "kits." 671
Experiment on gel filtration of proteins. 864
Liquid scintillation counting of $^{14}CO_2$ uptake in photosynthesis. 171
Monte Carlo method of predicting rate of complex reactions. 262
Optical properties of nucleic acids. 821
Solution chromatography of chloroplast pigments. 476
Thermodynamics of ATP. 713
Tracer experiment on antibiotic synthesis. 866
Two fluorescence experiments. 374
Urea electrode. 309
Biochemistry and astrophysics: An inquiry into the origins of hybrid sciences. **Aaron J. Ihde.** 193
Biochemistry, chemistry, and radioactivity, Applications in. The principle of exponential change. **Frank O. Green.** 451
Biochemistry in the undergradute curriculum. An interdisciplinary course. **Jerry R. Mohrig** and **Nancy M. Tooney.** 33
Biochemistry, Recollections of personalities involved in the early history of American. **William C. Rose.** 759
Biography
Fish, Velmer B. A323
Lomonosov, Mikhail. 295
O'Shaughnessy, Sir William Brooke. 99
Biosynthesis of an antibiotic: A ^{13}C tracer experiment. **I. T. Glover** and **C. L. Limbaugh.** 866
Birrell, George (P). 712
Bonding
Computer animation of molecular vibrations 334
Hybrid orbitals in MO theory. 487
Simplified MO approach to stereochemistry. 413
Bonding, Ionic versus covalent. **Dorothy M. Goldish** (TD). A497
Bonding parameter, A. **Jesse Elson.** 28, 86
Bond interaction, hydrogen-, Dielectric aspects of the. **Mansel Davis.** 17
Boron compounds, Nmr of. **G. R. Eaton.** 547
Borosilicate glass, A simple method for the identification of. **Robert F. Drake.** 48
Brominations, fast, Kinetics of. A potentiometric study. **A. E. Burgess** and **J. L. Latham.** 370
Bromine (TOPS). A356
Bulkin, Bernard J. (P). A781
Buret, An inexpensive motor-driven. **Lee D. Hansen, William M. Litchman, Edwin A. Lewis,** and **Ronald E. Allred.** 876
Burns, chemical and thermal, First aid for. Accident case histories (Safety). A31
Burn treatment, Hydrofluoric acid. **C. F. Reinhardt, W. G. Hume, A. L. Linch,** and **J. M. Wetherhold** (Safety). A171

Caffeine in tea, cola, and NoDoz, Cholesterol in gallstones and. Isotopic dilution analysis. **Addison Ault** and **Raymond Kraig.** 767
Calcium and strontium sulfates, The solubility curves for. **David Dyrssen, Elena Ivanova, and Kerstin Aren.** 252
Calcium, chelated, Turbidimetric determination of, at various pH levels. An analytical laboratory experiment. **Michael F. L'Annunziata** and **Wallace Fuller.** 172
Calculating the vapor pressure of water from the second law of thermodynamics. **M. H. Everdell.** 107
Calculation of dipole moments from oscillometric data, A computer program for. **Frank A. Settle, Jr.** and **Edward Talley.** 744
Calculation of Madelung constants by direct summation. **Wilbur B. Bridgman.** 592
Calculation of nmr shift using particle in a box wave functions. An undergraduate exercise. **R. B. Flewwelling** and **W. G. Laidlaw.** 355
Calculations, student quantum chemistry, Subroutines for evaluation of integrals for. **John P. Chesick.** 432
California Association of Chemistry Teachers
CACT eleventh annual summer conference. 268
Alicyclic chemistry: The playground for organic chemists. **Lloyd N. Ferguson.** 404
Drugs of the future. **J. Yule Bogue.** 468
Calorimetry. A chemistry projects laboratory. **J. I. Steinfeld.** 232
Calorimetry, Indirect, by computer in the general chemistry course. **Dennis DeMattia, Thomas Gruhn,** and **Mel Gorman.** 398
Carbon disulfide, Condensation reactions of. **William O. Foye.** 841
Carbonium ions of conjugated molecules. A physical organic experiment. **Paul Blatz, David Pippert, Larry Sherman,** and **V. Balasubramaniyan.** 512
Carbonyl compounds. Part II of Photochemistry of organic compounds. **John S. Swenton.** 217
Carbonyl mixtures, Determination of, by a differential reaction rate method: A kinetic experiment for the analytical course. **Harry B. Mark** and **Ronald A. Greinke.** 869
Carboxylic acid, Conversion of sucrose into a: An undergraduate experiment. **R. M. Carman** and **R. F. Evans.** 847
Carboxylic acids, Identification of. Use of N-methylpiperazine and N-phenylpiperazine. **J. G. Duff, D. K. Yung, R. J. Brenner, B. J. Wilson,** and **W. J. Racz.** 388
Catalysis and cleanliness. **Joseph E. Johnston** (TD). A547
Cations, The effect of, on the thermal decomposition of salts with oxyanions. A semi-empirical correlation. **Kurt H. Stern.** 645

Cell, Diffusion, for optically-active molecules and thin membranes. **Avrom A. Blumberg** and **Perlita A. Ilagan.** 238
Cesium chloride and rock salt crystal structures. Part II of A bonding parameter. **Jesse Elson.** 28
Chamber, Simple developing, for thin layer chromatography. **John N. Aronson.** 483
Chamber, A versatile and compact chromatographic. **J. Lehrfeld.** 848
Change, exponential, The principle of. Applications in chemistry, biochemistry, and radioactivity. **Frank O. Green.** 451
Charles law experiment, A pseudo-, to teach vapor pressure concepts. **Dean L. Sinclair.** 814
Chelated calcium, Turbidimetric determination of, at various *p*H levels. An analytical laboratory experiment. **Michael F. L'Annunziata** and **Wallace Fuller.** 172
Chemical education—Where to now? **L. Carroll King.** 540
Chemical genealogy. **C. N. McCarty.** 317
Chemical instrumentation, Topics in. **Galen W. Ewing,** *Editor.*
XLII. Infrared equipment for teaching. **Paul A. Wilks, Jr.** A9
XLIII. Mass spectrometers. **Galen W. Ewing**
Part I. A69
Part II. A149
Part III. Commercial spectrometers. A233
XLIV. Automation of organic elemental analysis. **Velmer B. Fish.** A323
XLV. Pressure transducers. **David J. Curran**
Part I. A401
Part II. A465
XLVI. The control of temperature. **Maarten Van Swaay**
Part I. A515
Part II. A565
XLVII. Multipurpose electroanalytical instruments. A717
XLVIII. Raman spectroscopy. **Bernard J. Bulkin**
Part I. A781
Part II. A859
Chemical kinetics, On. **Charles J. Swartz.** 308
Chemical queries. **J. Young** and **J. G. Malik.** 36, 227, 329(L), 444, 674.
Chemical safety slide rule. **Norman V. Steere** (Safety). A29
Chemical transport and zirconium. **M. C. Ball** (L). 185
Chemistry and the sense of wonder. **Rubin Battino.** 38
Chemistry for the high school student. **John Troland** (L). 124, 700(L)
Chemistry takes the peel out of paint. **Raymond R. Myers.** 173, 401(L)
Chloramine-T as a substitute for chlorine water in qualitative analysis. **B. G. K. Nair** and **C. G. R. Nair.** 755
Chloride ion, The effects of, and temperature on lead chloride solubility. A versatile quantitative experiment. **Allen C. West.** 773
Chlorides, group IV, Hydrolysis of. A laboratory experiment. **Claude H. Yoder.** 382
Chlorination of 2,3-dimethylbutane. A quantitative organic chemistry experiment. **J. Hodge Markgraf.** 610
Chlorine (TOPS). A218
Chloroplast pigments, Modifications of solution chromatography illustrated with. **Harold H. Strain** and **Joseph Sherma.** 476
Cholesterol in gallstones and caffein in tea, cola, and NoDoz. Isotopic dilution analysis. **Addison Ault** and **Raymond Kraig.** 767
Chromatographic chamber, A versatile and compact. **J. Lehrfeld.** 848
Chromatography
Apparatus for handling reactive liquids. 364
Applicator for preparative tlc. 249
Disc electrophoresis. 41
Monitoring by mass spectrometers (Chem. Inst.). A69, A149, A233
Photoisomerization of azobenzene using tlc. 117
Use of gas chromatography in organic experiment. 849
Chromatography, An introduction to. **G. M. Gaucher.** 729
Chromatography, Column, and spectrometry for separating two cobalt complexes. A laboratory experiment. **Donald L. Schmitt** and **Hans B. Jonassen.** 47
Chromatography experiment, A combustion-gas. **James R. Bard.** 441
Chromatography, Gas. A chemistry projects laboratory. **J. I. Steinfeld.** 234
Chromatography, gas, An inexpensive linear temperature programmer for. **E. Hautala** and **M. L. Weaver.** 122
Chromatography, Modifications of solution, illustrated with chloroplast pigments. **Harold H. Strain** and **Joseph Sherma.** 476
Chromatography, preparative thick-layer, A simple, inexpensive zone extractor for. **G. Kan** and **V. Snieckus.** 763
Chromatography, radial, A "sandwich" apparatus for demonstrating. **Anthony V. DeThomas** and **Francis Pascual.** 319
Chromatography, Thin-layer. A chemistry projects laboratory. **J. I. Steinfeld.** 235
Chromatography, thin layer, Reflectance spectroscopic analysis of dyes separated by. **M. M. Frodyma** and **R. W. Frei.** 522
Chromatography, thin layer, Simple developing chamber for. **John N. Aronson** 483
Chromatography, Three who pioneered in. **S. V. Heines.** 315
Circuits, Integrated, in the instrumental laboratory. **George A. Scherer** 399
Classification and notation, A system of, for typical close-packed structures. **Shih-Ming Ho** and **Bodie E. Douglas.** 207
Classification, point group, A key to. **Jerry Donohue.** 27
Cleanliness, Catalysis and. **Joseph E. Johnston** (TD). A547
Closed circuit television in freshman chemistry laboratories. **D. A. Humphreys** and **R. H. Tomlinson.** 618
Closed-packed structures, typical, A system of notation and classification for. **Shih-Ming Ho** and **Bodie E. Douglas.** 207
Cloud-seeding. 350
Cobalt, A simple method for the analysis of, in Co(III) complexes. **R. Graham Hughes, John F. Endicott, Morton Z. Hoffman,** and **D. A. House.** 440
Cobalt complexes, Synthesis and reactions of. A laboratory experiment. **Gary L. Olson.** 508
Cobalt complexes, two, Column chromatography and spectrometry for separating. A laboratory experiment. **Donald L. Schmitt** and **Hans B. Jonassen.** 47
Cobalt-60 irradiation, Nuclear isomers produced by. **Joseph J. Law.** 49
Coefficients of vapors, second virial, A student apparatus for measuring the. **Maurice L. Martin** and **Peter J. Dunlop.** 615
Coefficients, viscosity, of gases, Determination of the. **A. P. Malinauskas, S. J. Whisenhunt, Jr., and J. Q. Searcy.** 781
College chemistry teachers, A doctorate program for. **B. R. Siebring** (PO). 163
Colligative properties of solutions. A chemistry projects laboratory. **J. I. Steinfeld.** 232
Colloids (TOPS). A756, A843, A889
Colloquy, An organic. **Stuart B. Monroe.** 657
Column packing, Teflon enclosed steel spiral as. **Fred H. Greenberg.** 464
Combustion-gas chromatography experiment, A. **James R. Bard.** 441
Compensation, source intensity, in atomic fluorescence, An instrument for. **T. C. O'Haver** and **J. D. Winefordner.** 435
Complex dissociation and ligand field theory, Correlation between. A kinetics experiment. **G. Brumfitt.** 250
Complex reactions, Plotting the course of. The Monte Carlo method. **B. Rabinovitch.** 262
Complexes
Cryoscopic measurement of coordination number. 113
Crystal field potentials. 339
Eighteen electron rule. 811
Turnbull's blue and Prussian blue. 46
Complexes, Co(III), A simple method for the analysis of cobalt in. **R. Graham Hughes, John F. Endicott, Morton Z. Hoffman,** and **D. A. House.** 440
Complexes, cobalt, Synthesis and reactions of. A laboratory experiment. **Gary L. Olson.** 508
Complexes, Ion pairs and: Free energies, enthalpies, and entropies. **J. E. Prue.** 12
Complexes, ternary and mixed, Statistical factor in the formation and stability of. **V. S. Sharma** and **Jack Schubert.** 506
Complexes, two cobalt, Column chromatography and spectrometry for separating. A laboratory experiment. **Donald L. Schmitt** and **Hans B. Jonassen.** 47
Composite *pK*'s of cysteine. **Samuel J. Rogers** (TE). 239
Computer animation. On-line dynamic display in real time. **J. Scott Walton** and **William M. Risen, Jr.** 334
Computer graded qualitative analysis experiments. **J. L. Deutsch** and **E. W. Deutsch.** 649
Computer, Indirect calorimetry by, in the general chemistry course. **Dennis DeMattia, Thomas Gruhn,** and **Mel Gorman.** 398
Computerized physical chemistry experiment, A. **Morris Bader.** 206
Computerized soda ash experiment for first-year college chemistry, A. **Gustav P. Dinga.** 60
Computer program correction. **J. A. Slezak** (L). 534
Computer program for chemical kinetics by titration, A. **Boris Musulin.** 109
Computer program for the analysis of the N_2O_4 dissociation equilibrium. **Luther E. Erickson.** 383
Computer programs for calculating *p*H. **Gert G. Schlessinger.** 680
Computer use
Calculation of dipole moments. 744
Evaluation of integrals in quantum calculations. 432
Program for determining kinetics of proton exchange from nmr data 169
Simulation of the log (*K*)-*p*H profiles. 861
Computing ligand field potentials and relative energies of *d* orbitals: A simple, general approach. **R. Krishnamurthy** and **Ward B. Schaap.** 799
Conant Award recipients, 1970. 712
Condensation polymerization, Kinetics of. Preparation of a polyester. **Edward L. McCaffery.** 59
Condensation reactions of carbon disulfide. **William O. Foye** (NEACT). 841
Condensed norms: ACS cooperative examinations. 182
Conductor, A simple tester for a. **Shukichi Yamana, Hikaru Yamana,** and **Hajimu Yamana.** 354
Configuration of D-glucose, A simplified proof of the constitution and the. **Y. Z. Frohwein.** 55
Conformation of macromolecules. A physical chemistry experiment. **D. H. Napper.** 305
Conjugated molecules, Carbonium ions of. A physical organic experiment. **Paul Blatz, David Pippert, Larry Sherman,** and **V. Balasubramaniyan.** 512
Connector, glass-to-glass, A convenient. **Kenneth E. Collins.** 179
Constant pressure gas absorption reactor, A. **M. B. Kennedy** and **J. R. Lacher.** 533
Constants, Madelung, Calculation of, by direct summation. **Wilbur B. Bridgman.** 592
Constants, reaction rate, Tables of conversion factors for. **D. D. Drysdale** and **A. C. Lloyd.** 54

Constants, Solubility product, Potentiometric determination of: A laboratory experiment. **Stanford L. Tackett.** 857
Constitution and the configuration of D-glucose, A simplified proof of the. **Y. Z. Frohwein.** 55
Construction and uses of an inexpensive polarimeter. **Mary S. Vennos.** 459
Consulting service, College chemistry. 662
Contour diagrams for relativistic orbitals. **Attila Szabo.** 678
Controls, stirring and atmosphere, Reaction vessel with. **Charles Carraher, Jr.** 314
Controversy, The current: ATP synthesis. **David W. Deamer.** 198
Conversion factors, Tables of, for reaction rate constants. **D. D. Drysdale** and **A. C. Lloyd.** 54
Conversion of sucrose into a carboxylic acid: An undergraduate experiment. **R. M. Carman** and **R. F. Evans.** 847
Cooled, water-, devices, Safety shut-off for. **R. A. Bailey, M. El-Guindy, W. Tangredi,** and **J. A. Walden.** 30
Coordination number of copper(II), Cryoscopic measurement of the. **Hebe Coda de Lorenzo, Juan A. Coch Frugoni,** and **Valentin Lopez.** 113
Copper chromate, basic, The stoichiometry of silver chromate and. Investigations for the freshman laboratory. **L. H. Kalbus** and **R. H. Petrucci** 776
Copper(II), Cryoscopic measurement of the coordination number of. **Hebe Coda de Lorenzo, Juan A. Coch Frugoni,** and **Valentin Lopez.** 113
Correlation between ligand field theory and complex dissociation. A kinetics experiment. **G. Brumfitt.** 250
Correlation of composition of acid solutions with activity and acidity functions. **Charmian J. O'Connor.** 686
$^{14}CO_2$, Simple liquid scintillation counting of. **J. R. Loewenberg** and **Ralph Grunewald.** 171
Coulometric titration, A simple amperostat for. **Colin A. Vincent** and **J. G. Ward.** 613
Coulometric titration, constant current, Transistorized power sources for. **John T. Stock.** 858
Coumarin, The historical and current interest in. **John Leo Abernethy.** 561, 856(E)
Counter-current distribution as a student laboratory experiment. **Bengt Lindblad, Goran Lindstedt,** and **Hans-Goran Tiselius.** 525
Counting, Liquid scintillation. Singlet-singlet energy transfer processes. **William Yang** and **Edward K. C. Lee.** 277
Counting, Simple liquid scintillation, of $^{14}CO_2$. **J. R. Loewenberg** and **Ralph Grunewald.** 171
Coupling, Oxidative: A new approach to azo chemistry. **S. Hunig.** 734
Course designed for the non-scientist, A. **Charles Keilin** (Symposium on courses for non-science majors). 66
Course in physics and chemistry, A natural philosophy. **Harold G. Cassidy** (Symposium on courses for non-science majors). 64
Covalent bonding, Ionic versus. **Dorothy M. Goldish** (TD). A497
Criteria for optical activity in organic molecules. **Dwight F. Mowery, Jr.** 269, 700(L)
Critical points of solutions. A chemistry projects laboratory. **J. I. Steinfeld.** 234
Cryoscopic measurement of the coordination number of copper(II). **Hebe Coda de Lorenzo, Juan A. Coch Frugoni,** and **Valentin Lopez.** 113
Crystal field potentials. **S. F. A. Kettle.** 339
Crystal growth, Apparatus for the purification and, of organic compounds. **C. C. Gravatt** and **Paul M. Gross.** 693
Crystallography
Calculation of Madelung constants. 592
History of isomorphism. 580
Key to point group classification. 27
Molecular symmetry models. 23
Notation and classification of close-packed structures 207
Crystallography, X-ray. A chemistry projects laboratory. **J. I. Steinfeld.** 233
Crystals, A flotation method for growing large single. **Andrew J. Fischinger.** 486
Crystal structures, Rock salt and cesium chloride. Part II of A bonding parameter. **Jesse Elson.** 28
Cupferron as a reagent in qualitative analysis. **A. O. Parks and Betsy DuBose.** 768
Curran, David J. (P). A401
Curriculum
A decade of winter term. 659
Analytical chemistry for honors students. 519
Course designed for the non-scientist. 66
Doctorate program for college chemistry teachers (PO). 163
Doctorates and languages (PO). 740
First semester qualitative analysis. 837
General college chemistry should be general (PO). 237
International congress on the integration of science teaching: A summary report. 180
Load problem (PO). 31
Natural philosophy course in physics and chemistry. 64
One-month instrumental analysis course. 661
Organic colloquy in January term. 657
Placement of freshmen. 160
Projects lab at M.I.T. 232
PSNS project. 69
Research approach in the introductory laboratory. 447
Survey of advanced placement courses. 229
Symposium on courses for non-science majors. 64
Symposium on January term. 653
Trends in doctoral chemical education. 71
Undergraduate research at Argonne. 672
Curriculum, A new course in the chemistry? Introductory alchemy: **A. Truman Schwartz** 655
Curriculum, An integrated physics-chemistry, for science majors. **George G. Lowry.** 393
Curriculum, The chemistry, and the January term. **C. R. Barr** and **J. L. Mackey.** 653
Curriculum, undergraduate, Biochemistry in the. An interdisciplinary course. **Jerry R. Mohrig** and **Nancy M. Tooney.** 33
Curve reading device, An automatic. **K. C. O'Kane and N. B. Jurinski.** 460
(Cyanoguanidine) Dicyandiamide. **Richard F. Stockel** (TE). 391
Cylindrical separatory funnel and rack, A small. **Laurids E. Ross** and **Ruth A. Juvinall.** 322
Cysteine, Composite *pK*'s of. **Samuel J. Rogers** (TE). 239
Danforth, Joseph D. (P). 556
Decade of winter term, A. **Richard W. Neithamer, Robert J. Hatala,** and **Philip R. Ferguson.** 659
Decomposition of di-*t*-butyl peroxide, The. A simple apparatus for gas reactions. **A. F. Trotman-Dickenson.** 396
Decomposition, Thermal, of water by the use of the Nernst glower. **John O. Glaser** (TD). A497
Decomposition, thermal, of salts with oxyanions, The effect of cations on the. A semi-empirical correlation. **Kurt H. Stern.** 645
Decomposition, The thermal, of 2,5-dihydrofuran vapor. An experiment in gas kinetics. **Jay A. Rubin** and **Stephen V. Filseth.** 57
Definition of detection limits, The. **M. L. Parsons.** 290
Degassing samples of low volatility. **Roger E. Rondeau.** 504
Dehydration of 3,3-dimethyl-2-butanol. **Richard L. Taber, Gary D. Grantham,** and **William C. Champion.** 849
Delocalized, Localized and, molecular orbital descriptions of methane. **William A. Bernett.** 746
Demonstrations based on nuclear and radiochemical phenomena, General chemistry. **Rolfe H. Herber.** 665
Demonstrations of gases in motion, Simple: Graham's laws. **E. A. Mason** and **R. B. Evans, III**
Part I, Theory. 358
Part II, Experiments. With **Love, L. D.** 423
Dendritic structure, A three-dimensional model of. **Robert C. Olsen.** 496
De Rose, James V. (P). 712
Detection limits, The definition of. **M. L. Parsons.** 290
Determination of a liquid-vapor equilibrium curve, A simple method for the. **John P. Idoux.** 532
Determination of paramagnetic susceptibility by nmr. A physical chemistry experiment. **John L. Deutsch** and **Stephen M. Poling.** 167
Determine the half-life of ^{40}K, Method to. **Manuel Navarrete.** 368
Deuterated materials in a nonpolar solvent, Generation of. **John D. Worley and Daniel A. Garteiz.** 608
Diagnostic-prescriptive essay exams. Computer graded, professor evaluated, student used. **Jay A. Young.** 323
Diagrams, Binary phase. **Alan F. Berndt** (TE). 594
Diagrams, Contour, for relativistic orbitals. **Attila Szabo.** 678
Diagrams, potential-*p*H, A periodic table based on. **J. A. Campbell** and **R. A. Whiteker.** 90
1,1-Dichloroethane, Kinetics of the gas phase pyrolysis. A physical chemistry experiment. **G. R. DeMaré, P. Goldfinger, G. Huybrechts, J. Olbregts,** and **M. Toth.** 684
Dicyandiamide (cyanoguanidine). **Richard F. Stockel (TE).** 391
Dielectric aspects of the hydrogen-bond interaction. **Mansel Davies.** 17
Diethylzinc, Edward Frankland and. Part II of Historical origins of organometallic chemistry. **John S. Thayer.** 764
Differential reaction rate method, Determination of carbonyl mixtures by a: A kinetic experiment for the analytical course. **Harry B. Mark** and **Ronald A. Greinke.** 869
Diffusion, A quantitative, experiment for students. **M. De Paz.** 784
Diffusion cell for optically-active molecules and thin membranes. **Avrom A. Blumberg and Perlita A. Ilagan.** 238
Diffusion from gels. **Daniel M. Speyer, Zvi, Blank,** and **Walter Brenner (L).** 536
Diffusion of potassium permanganate as a lecture demonstration. **C. R. Conrad** and **H. E. Bent.** 758
2,5-Dihydrofuran vapor, The thermal decomposition of. An experiment in gas kinetics. **Jay A. Rubin and Stephen V. Filseth.** 57
Dilution analysis, Isotopic. Cholesterol in gallstones and caffein in tea, cola, and NoDoz. **Addison Ault** and **Raymond Kraig.** 767
Dilution, high, The behavior of partial molar quantities at. **J. E. Garrod** and **Thelma M. Herrington** (TE). 165
2,3-Dimethylbutane, Chlorination of. A quantitative organic chemistry experiment. **J. Hodge Markgraf.** 610
3,3-Dimethyl-2-butanol, The dehydration of. **Richard L. Taber, Gary D. Grantham,** and **William C. Champion.** 849
Dimethyl sulfoxide, Hydrolysis of latex paint in: An organic laboratory experiment. **Joe A. Vinson.** 877
Dimethyl sulfoxide, Saponification of aspirin

in. **Joe A. Vinson** and **Edward K. Hocker.** 245
Dipole moments: A physical-organic experiment. **Robert D. Rapp** and **James E. Sturm.** 851
Dipole moments from oscillometric data, A computer program for calculation of. **Frank A. Settle, Jr.** and **Edward Talley.** 744
Disc electrophoresis. **John M. Brewer** and **Raymond B. Ashworth.** 41
Disconnect, A quick-, fitting for gas handling applications. **T. Ehlert.** 196
Discovery of the electron, On the. **B. A. Morrow.** 584
Dispensing solid samples in teaching laboratories, A convenient device for. **George R. Brubaker** and **George T. Behnke.** 318
Display, On-line dynamic, in real time. Computer animation. **J. Scott Walton** and **William M. Risen, Jr.** 334
Dissociation equilibrium, N_2O_4, A computer program for the analysis of the. **Luther E. Erickson.** 383
Distribution, Counter-current, as a student laboratory experiment. **Bengt Lindblad, Goran Lindstedt,** and **Hans-Goren Tiselius.** 525
Distribution experiment, A. **J. A. Campbell, Douglas Nelson,** and **John Rudesill.** 454
Distribution law, fundamental, Concerning the. **George L. Jones, Jr.** and **Gilbert V. Sheldon.** 320
Di-*t*-butyl peroxide, The decomposition of. A simple apparatus for gas reactions. **A. F. Trotman-Dickenson.** 396
Division of Chemical Education
Communication from the chairman. **William B. Cook.** 197
Condensed Norms: ACS Cooperative examinations. 182
DuPont Small grants program. 112, 216, 593, 639, 772
Examination committee recognizes retiring members. 453
International congress on the integration of science teaching: A summary report. **Edward C. Fuller.** 180
New officers for 1970. 556
Nominations for officers. 181, 338, 344
Program for the 157th meeting. A180
Proposed bylaw change. 328
Statement from the treasurer. **J. D. Danforth.** 328
Doctoral chemical education, Trends in. **Robert H. Linnell** and **Douglas S. Chapin.** 71
Doctorate program for college chemistry teachers, A. **B. R. Siebring** (PO). 164
Doctorates and languages. **Julian F. Smith** (PO). 740
Drugs of the future. **J. Yule Bogue.** 468
Duhamel's theorem. **Luis A. Veguilla-Berdecia.** 312
Dyes, Reflectance spectroscopic analysis of, separated by thin layer chromatography. **M. M. Frodyma** and **R. W. Frei.** 522
Dynamic display, On-line, in real time. Computer animation. **J. Scott Walton** and **William M. Risen, Jr.** 334

Economics in the chemical industry. **K. M. Reese** (Indus. Chem.)
Part I. 725
Part II. 827
Editorially speaking
The colleges and participatory democracy. 1
Practical wisdom and the non-science major. 63
What chemistry really is. 127
An ebbing from success. 189
AC_3 and the price of devisiveness. 261
Learning and the value sphere. 333
The faculty and the public. 403
An August image. 467
The humanism dimension. 539
A new quality of citizenship. 625
What and how much is learned. 705
Rights, obligations, and opportunities. 793
Education, Chemical—Where to now? **L. Carroll King.** 540
Education, doctoral chemical, Trends in. **Robert H. Linnell** and **Douglas S. Chapin.** 71
Egg boiling. **Carole R. Gatz** (L). 534, 879(L)
Eighteen electron rule, The. **P. R. Mitchell** and **R. V. Parish.** 811
Elastic molecular scattering. Elementary quantum theory of. **C. J. G. Raw** and **A. J. Karrenbrock.** 589
Electroanalytical instruments, Multipurpose. **Galen W. Ewing** (Chem. Inst.). A717
Electrochemistry
Dielectric aspects of H-bond. 17
Experiment on Gibbs-Helmholtz relationship. 52
Liquid-liquid membrane electrode (CQ). 446
Potential-*p*H diagrams. 90
Preparing spherical metal electrodes. 103
Real cells and the Nernst equation (CQ). 227
Standard potential of Ag-AgBr electrode (TE). 741
Electrode, A urea. 309
Electrodeposition experiments, Apparatus for. **G. F. Atkinson** and **John H. Shaw.** 387
Electrode potential of the silver-silver bromide electrode, The standard. **R. L. Venable** and **D. V. Roach** (TE). 741
Electrodes, spherical metal, A simple method for preparing. **Thomas F. Sharpe** and **Stuart G. Meibuhr.** 103
Electrolytic preparation of iodoform. **K. Helle, J. A. Rijks, L. J. J. Janssen,** and **J. W. Schuyl.** 518
Electromotive force of chemical reactions. A chemistry projects laboratory. **J. I. Steinfeld.** 232
Electron, On the discovery of the. **B. A. Morrow.** 584
Electron rule, The eighteen. **P. R. Mitchell** and **R. V. Parish.** 811
Electrophilic additions to alkenes. **William R. Dolbier, Jr.** (RS). 342
Electrophoresis, Disc. **John M. Brewer** and **Raymond B. Ashworth.** 41
Electrophoresis on paper, Simplified apparatus for. **J. Dudley Herron.** 527
Elemental analysis, organic, Automation of. **Velmer B. Fish** (Chem. Inst.). A323
Elementary school, Science experiment safety in the. **Charles A. Mann** (Safety). A347
Emergency eye wash fountain. **Maurice Golden** (Safety). A269
Encounters and slow reactions. **Cooper H. Langford.** 557
Endothermic reaction, A spontaneous. **Arthur N. Hambly** (TD). A55
Energies, Free, enthalpies, and entropies. Ion pairs and complexes. **J. E. Prue.** 12
Energies, relative, Computing ligand field potentials and, of *d* orbitals: A simple, general approach. **R. Krishnamurthy** and **Ward B. Schaap.** 799
Energy, Activation, determination. An organic chemistry experiment. **Ashley M. Bryan** and **Patrick G. Olafsson.** 248
Energy of activation. **John P. Idoux** (TD). A547
Energy transfer processes, Singlet-singlet, Liquid scintillation counting. **William Yang** and **Edward K. C. Lee.** 277
Engineering chemistry laboratory, multisectioned, Practical exam for a. **Alfred M. Rozeiu.** 120
Entropies, free energies, and enthalpies. Ion pairs and complexes. **J. E. Prue.** 12
Entropy change for temperature equilibration processes. **C. W. Pyun.** 677
Enzyme kinetics. A chemistry projects laboratory. **J. I. Steinfeld.** 232
Equilibria measurements, Apparatus for vapor-liquid. **Alim Ullah.** 820
Equilibrium curve, liquid-vapor, A simple method for the determination of a. **John P. Idoux.** 532
Equilibrium, N_2O_4 dissociation, A computer program for the analysis of the. **Luther E. Erickson.** 383
Equivalent weight apparatus, An improved. **Oliver L. I. Brown.** 617
Errata: Alicyclic chemistry. **L. N. Ferguson.** [**46,** 404 (1969)]. 856
Errata: A mnemonic for Maxwell's thermodynamic relations (L). **Karen Y. Reinheimer** [**46,** 535 (1969)]. 856
Errata: The historical and current interest in coumarin. **John L. Abernethy.** [**46,** 561 (1969)]. 856
Errata: The increased-valence theory of valence. **R. D. Harcourt.** [**45,** 779 (1968)]. 856
Essay exams, Diagnostic-prescriptive. Computer graded, professor evaluated, student used. **Jay A. Young.** 323
Essential oils, The: A series of laboratory experiments. **Olaf Runquist.** 846
Ester, Identification of an unknown. An analytical-organic experiment. **Robert L. Grob** and **G. Ronald Husk.** 769
Etching, glass, A convenient stencil for. **Ernest C. Alix.** 863
Exam for a multisectioned engineering chemistry laboratory, Practical. **Alfred M. Rozeiu.** 120
Examination grading, Audio aids in. **Alfred R. Pray.** 327
Examinations: Essay or objective, two views. **P. A. Ongley** and **Clifford C. Houk** (PO). 830
Examinations, ACS cooperative: Condensed norms. 182
Exams, Diagnostic-prescriptive essay. Computer graded, professor evaluated, student used. **Jay A. Young.** 323
Experiment, A computerized physical chemistry. **Morris Bader.** 206
Experiment, Science, safety in the elementary school. **Charles A. Mann** (Safety). A347
Experiments, electrodeposition, Apparatus for. **G. F. Atkinson** and **John H. Shaw.** 387
Explosions and fires. Accident case histories (Safety). A31
Exponential change, The principle of. Applications in chemistry, biochemistry, and radioactivity. **Frank O. Green.** 451
Extension of the periodic table, Prospects for further considerable. **Glenn T. Seaborg.** 626
Extensive and intensive properties of simple systems The mathematical behavior of. **Alan J. Brainard.** 104
Extraction, liquid-liquid, Tantalum recovery by. **Guy B. Alexander** (IC). 157
Extractor, A simple "heavier-than-water." **Carl H. Snyder.** 26

Factorial design experiment for the introductory organic laboratory, A. The Hantzsch pyridine synthesis. **B. E. Norcross, G. Clement,** and **M. Weinstein.** 694
Fahrenheit's thermometer, Description of. 192
$FClO_3$ hazard. **G. Nomine** and **G. Muller** (L). 329
Field potentials, Crystal. **S. F. A. Kettle.** 339
Films for chemical education. **W. Robert Barnard** and **Samuel Schrage** (TA). 325
Films, frozen, at 77°K, The infrared spectra of gases at 300°K and of. A physical chemistry experiment. **William A. Guillory.** 681
Film-TV production techniques, Advanced. **W. Robert Barnard** and **George Tressel** (TA)
Part I, lighting. 461
Filtration apparatus, A semi-micro hot. **Richard W. Kocon.** 516
Fires and explosions. Accident case histories (Safety). A31
First aid for chemical and thermal burns. Accident case histories (Safety). A31
First semester qualitative analysis. **James H. DeLap.** 837

First-year college chemistry. A computerized soda ash experiment for. **Gustav P. Dinga.** 60
Flame test, potassium, Improving the. **Frederick C. Strong, III.** 178
Flash photolysis studies of iodine atom recombination. **J. A. Blake, George Burns,** and **S. K. Chang.** 745
Flotation method for growing large single crystals. **Andrew J. Fischinger.** 486
Flow technique, The stirred. Mathematically developed applications for complex kinetic reactions. **Jay E. Taylor.** 742
Fluid-flow simulation of molecular orbitals. **Roger G. Gymer.** 493
Fluids, Intermolecular potential and virial in. **Andrew G. De Rocco.** 365
Fluorescence, atomic, An instrument for source intensity compensation in. **T. C. O'Haver** and **J. D. Winefordner.** 435
Fluorescence experiments, Two. **Salvatore F. Russo.** 374
Fluorine (TOPS). A218
For the next quarter of a century. **A. B. Garrett.** 576
Fountan, Emergency eye wash. **Maurice Golden** (Safety). A269
Franck-Hertz experiment and rare gas chemistry. A chemistry projects laboratory. **J. I. Steinfeld.** 235
Frankland, Edward, and diethylzinc. Part II of Historical origins of organometallic chemistry. **John S. Thayer.** 764
Free energies, enthalpies, and entropies. Ion pairs and complexes. **J. E. Prue.** 12
Free radical telomerizations, Product distributions in. **W. G. Lloyd.** 299
Freeze dryer. Accident case histories (Safety). A32
Freon-12 as an oxygen scavenger. **Joseph E. Nelson.** 292
Freshman chemistry program, Videotaped help sessions in a. **Norman V. Duffy** and **Joseph H. Walsh.** 392
Freshman chemistry laboratories, Closed circuit television in. **D. A. Humphreys** and **R. H. Tomlinson.** 618
Freshman chemistry seminar. **Paul E. Lensman, Maureen A. March, Lesley Herbst,** and **Noel J. Farrier.** 422
Freshman chemistry, The use of "programmed lectures" in. **James W. Barnes, John H. Bedenbaugh,** and **Fred W. Brown.** 622
Freshmen, Placement of, in the chemistry program. **Richard W. Haffner.** 160
Friday experiments. **Jack E. Bissey** (PR). 497
Frozen films at 77°K, The infrared spectra of gases at 300°K and of. A physical chemistry experiment. **William A. Guillory.** 681
Fuel conversion in transport phenomena. **E. R. Gerlach.** 455, 701(L)
Fuel, Powerful space: Liquid hydrogen. 143
Fume hoods, Photochemical: Design and construction. **Virgil I. Stenberg.** 176
Functions, hydrogen-like wave, The graphical representation of. **Berta Perlmutter-Hayman** (TE). 428
Functions, particle in a box wave, Calculation of nmr shift using. An undergraduate exercise. **R. B. Flewwelling** and **W. G. Laidlaw.** 355
Fundamental distribution law, Concerning the. **George L. Jones, Jr.** and **Gilbert V. Sheldon.** 320
Funnel, A small cylindrical separatory, and rack. **Laurids E. Ross** and **Ruth A. Juvinall.** 322
Fused salt investigations needed. **Paul V. Clark** (L). 329

Gas absorption reactor, A constant pressure. **M. B. Kennedy** and **J. R. Lacher.** 533
Gas chromatography. A chemistry projects laboratory. **J. I. Steinfeld.** 234
Gas chromatography, An inexpensive linear temperature programmer for. **E. Hautala** and **M. L. Weaver.** 122
Gas chromatography experiment, A combustion-. **James R. Bard.** 441
Gases, Determination of the viscosity coefficients of. **A. P. Malinauskas, S. J. Whisenhunt, Jr.,** and **J. Q. Searcy.** 781
Gases in motion, Simple demonstrations of: Graham's laws. **E. A. Mason** and **R. B. Evans, III.**
Part I, Theory 358
Part II, Experiments. With **Love, L. D.** 423
Gases, real, Properties of, in the limit of zero pressure. **Yecheskel Rasiel** and **Wade A. Freeman** (TE). 310
Gases, The infrared spectra of, at 300°K and of frozen films at 77°K. A physical chemistry experiment. **William A. Guillory.** 681
Gases, The noble, and the periodic table. Telling it like it was. **John H. Wolfenden.** 569
Gas handling applications, A quick-disconnect fitting for. **T. Ehlert.** 196
Gas handling system for the freshman laboratory, An inexpensive vacuum and. **R. W. Zuehlke** and **P. G. Cartier.** 874
Gas kinetics, An experiment in. The thermal decomposition of 2,5-dihydrofuran vapor. **Jay A. Rubin** and **Stephen V. Filseth.** 57
Gas phase pyrolysis of 1,1-dichloroethane, Kinetics of the. A physical chemistry experiment. **G. R. DeMaré, P. Goldfinger, G. Huybrechts, J. Olbregts,** and **M. Toth.** 684
Gas reactions, A simple apparatus for. The decomposition of di-*t*-butyl peroxide. **A. F. Trotman-Dickenson.** 396
Gel filtration of proteins, Student experiments on the. **F. Dewhurst.** 864
Genealogy, Chemical. **C. N. McCarty.** 317
General chemistry
Analysis of cobalt in Co(III) complexes. 440
Atmospheric pressure from barometer readings. 321
Atomic orbitals' order of energy increase (CQ). 445
Avogadro's number by four methods. 40
Avogardo's number from the volume of a monolayer. 779
Basic oxygen steelmaking (IC). 293
Catalysis and cleanliness (TD). A547
Compact chromatographic chamber. 848
Computer animation of molecular vibrations. 334
Computerized soda ash experiment. 60
Condensed norms: ACS cooperative examinations. 182
Conversion of *p*H to [H$^+$]. 22
Converting Fahrenheit to Celsius scales (CQ). 444
Course designed for the non-scientist. 66
Definition of "transition series" (CQ). 228, 329(L)
Dependence of reaction rate of temperature (CQ). 674
Device for dispensing solid samples. 318
Discovery of the electron. 584
Electrolytic preparation of iodoform. 518
Energy of activation (TD). A547
Entropy for the beginner (CQ). 36
16 Experiments used in individual projects lab. 232
Experiment to teach vapor pressure concepts. 814
Fahrenheit's thermometer. 192
Films for chemical education (TA). 325
First semester qualitative analysis. 837
Flotation method for growing crystals. 486
Fluid-flow simulation of molecular orbitals. 493
Freshman chemistry seminar. 422
Friday experiments (PR). 497
Graphical representation of hydrogen-like wave functions (TE). 428
Hydrofluoric acid burn treatment (Safety). A171
Improved equivalent weight apparatus. 617
Ionization of transition elements (CQ). 444
Law of mass action. 499
Liquid-liquid membrane electrode (CQ). 446
Molecular symmetry models. 23
Natural philosophy course in physics and chemistry. 64
Negative *p*H (CQ). 36
Notation and classification of close-packed structures. 207
Placement of freshmen. 160
Polarimeter for an overhead projector. 58
Potassium flame test. 178
Practical exam for large section. 120
Prediction of molecular polarity by V.S.E.P.R. theory. 283
Principles of semiconductors. 80
"Programmed lectures." 622
PSNS project. 69
Quantities of work. 380
Radioisotope generators for introductory use. 287
Real cells and the Nernst equation (CQ). 227
Sources of fp depression error (CQ). 37
Spot plate. 56
Stable isotopes of the atmosphere. 706
Standard potential of Ag-AgBr electrode (TE). 741
Statistical evaluation of laboratory experiments. 119
Stoichiometry of silver chromate and basic copper chromate. 776
Structure of solid aluminum chloride (TE). 495
Synthesis of Co compounds as independent research. 447
Tester for a conductor. 354
Thermochemistry of hypochlorite oxidations. 378
Three-dimensional model of dendritic structure. 496
Use of baby-bottles in lab. 878
Vacuum system for freshman lab. 874
Xerography experiment. 530
General chemistry, A versatile reagent for. **G. A. Dauphinee** and **M. L. Heit.** 660
General chemistry course, Indirect calorimetry by computer in the. **Dennis DeMattia, Thomas Gruhn,** and **Mel Gorman.** 398
General chemistry demonstrations based on nuclear and radiochemical phenomena. **Rolfe H. Herber.** 665
General college chemistry should be general. **Edward C. Fuller** (PO). 237
Generation of deuterated materials in a nonpolar solvent. **John D. Worley** and **Daniel A. Garteiz.** 608
Generators, Radioisotope, for introductory laboratory use. **H. L. Crater, J. B. Macchione, W. J. Gemmill,** and **H. H. Kramer.** 287
Germanium, silicon, tin, and lead compounds, asymmetric, Resolution and stereochemistry of. **Robert Belloli.** 640
Gibbs-Helmholtz relationship, Laboratory experiment concerning the. **Richard S. Johnson** and **David E. Crawford.** 52
Gifford, Dorothy W. (P). 712
Grading, examination, Audio aids in. **Alfred R. Pray.** 327
Grading in Indian universities. **R. C. Kapoor** and **S. P. Rao.** 839
Graduate students, Organic laboratory for. **Melvin S. Newman** (PO). 386
Graham's law: Simple demonstrations of gases in motion. **E. A. Mason** and **R. B. Evans, III**
Part I, Theory. 358
Part II, Experiments. With **Love, L. D.** 423
Graphical method for acidity constants. **Ludwig Heck** (L). 535
Graphical representation of hydrogen-like wave functions, The. **Berta Perlmutter-Hayman** (TE). 428
Group IV chlorides, Hydrolysis of. A laboratory experiment. **Claude H. Yoder.** 382
Group classification, point, A key to. **Jerry Donohue.** 27
Growing large single crystals, A flotation method for. **Andrew J. Fischinger.** 486
Gordon research conference, 1969. 385

Glass and mosaics, Mikhail Lomonosov and the manufacture of. **Henry M. Leicester.** 295
Glass, borosilicate, A simple method for the identification of. **Robert F. Drake.** 48
Glass etching, A convenient stencil for. **Ernest C. Alix.** 863
Glass-to-glass connector, A convenient. **Kenneth E. Collins.** 179
Glass-to-metal seal, A strong and inexpensive. **John E. Benson** and **Robert L. Garten.** 766
Glass tubing, A convenient method for sealing metallic wires into. **A. K. Vijh** and **R. S. Alwitt.** 121
Glassware, scientific, Storage of, in polyethylene pellets. **LeRoy W. Haynes** and **Elmer B. Beyerle.** 853
D-Glucose, A simplified proof of the constitution and the configuration of. **Y. Z. Frohwein.** 55

Half-life of ^{40}K by liquid scintillation, The: Nucleonics experiment. **Ralph Grunewald.** 369
Half-life of ^{40}K, Method to determine the. **Manuel Navarrete.** 368
Halogens, The. Group VII (TOPS). A107
Halogens, the alkali, Water solubilities and melting points of. Part III of A bonding parameter. **Jesse Elson.** 86
Handbooks and manuals, Safety (Safety)
a. Merck, Sharp and Dohme Research Laboratories. A427
b. Honeywell Corporate Research Center. A487
c. Ohio State University. A597
d. Harvard University. A741
e. Laboratory safety handbook, Mallinckrodt Chemical Works. A813
f. Monsanto Chemical Co. A881
Handling, gas, applications, A quick-disconnect fitting for. **T. Ehlert.** 196
Handling reactive liquids, An apparatus for. **M. C. Waldman.** 364
Hansch, Corwin (P). 379
Hantzsch pyridine synthesis, The. A factorial design experiment for the introductory organic laboratory. **B. E. Norcross, G. Clement,** and **M. Weinstein.** 694
Hard boiled egg controversy. **John V. Rund** (L). 879
Hard boiled egg controversy, The. **Arthur O. Long** (L). 879
Harrison, Anna Jane (P). 379, 556
Hazards, Ozone. **G. T. Gatwood** and **G. F. Murphy** (Safety). A103
Help sessions, Videotaped, in a freshman chemistry program. **Norman V. Duffy** and **Joseph H. Walsh.** 392
Hexacyanocobaltate(III), potassium, The preparation of. **Paul S. Poskozim.** 384
High school chemistry
Basic oxygen steelmaking (IC). 293
Chem Study electrolysis experiment (CQ). 676
Condensed norms: ACS cooperative examinations. 182
Conversion of *p*H to [H$^+$]. 22
Definition of "transition series" (CQ). 228, 329(L)
Device for dispensing solid samples. 318
Fahrenheit's thermometer. 192
Films for chemical education (TA). 325
Flotation method for growing crystals. 486
Negative *p*H (CQ). 36
Prediction of molecular polarity by V.S.E.P.R. theory. 283
Radioisotope generators for introductory use. 287
Simple electrophoresis. 527
Sources of fp depression error (CQ). 37
Spot plate. 56
Tester for a conductor. 354
Thermochemistry of hypochlorite oxidations. 378
Three-dimensional model of dendritic structure. 496
High school courses. **A. G. Briggs** (L). 700
DL-Histidine, The resolution of. An organic chemistry experiment using an ion exchange resin. **Arthur J. Bosch.** 691
Historical and current interest in coumarin, The. **John Leo Abernethy.** 561, 856(E)
Historical origins of organometallic chemistry. **John S. Thayer.**
Part I. Zeise's salt. 442
Part II. Edward Frankland and diethylzinc. 764
History of chemistry
American forerunners of the periodic law. 128
Chemical genealogy. 317
Discovery of the electron. 584
Early American biochemists. 759
Fahrenheit's thermometer. 192
Mikhail Lomonosov and the manufacture of glass and mosaics. 295
Noble gases and the periodic table. 569
Note on beryllium. 276
One hundred and fifty years of isomorphism. 580
Origins of astrophysics and biochemistry. 193
Origins of organometallics (diethylzinc). 764
Priority conflict between Mendeleev and Meyer. 136
Sir William Brooke O'Shaughnessy in India. 99
Three who pioneered in chromatography. 315
HMO theory in the sophomore organic class. **Stephen P. Molnar** (L). 330
Holder, A quick-mounting sample, for infrared work. **Leonard E. Brady** and **John Wozny.** 272
Honeywell Corporate Research Center. Safety manuals and handbooks (Safety). A487, A529
Honors applied chemistry students, Analytical chemistry for. **G. F. Atkinson.** 519
Hoods, Photochemical fume: Design and construction. **Virgil I. Stenberg.** 176
Humanism, contemporary, Chemical thermodynamics and. **R. W. Missen.** 35
Hybrid orbitals in molecular orbital theory. **Irwin Cohen** and **Janet Del Bene.** 487
Hybrid sciences, An inquiry into the origins of: Astrophysics and biochemistry. **Aaron J. Ihde.** 193
Hydrazine, The oxidation of, by basic iodine solutions: A stoichiometric study. **J. N. Cooper** and **R. W. Ramette.** 872
Hydrocarbon and barium danger. Accident case histories (Safety). A32
Hydrofluoric acid burn treatment. **C. F. Reinhardt, W. G. Hume, A. L. Linch,** and **J. M. Wetherhold** (Safety). A171
Hydrogen, liquid: Powerful space fuel. 143
Hydrogen-bond interaction, Dielectric aspects of the. **Mansel Davies.** 17
Hydrogen-like wave functions, The graphical representation. **Berta Perlmutter-Hayman** (TE). 428
Hydrolysis of adenosine triphosphate, Thermodynamics of the. **Robert A. Alberty.** 713
Hydrolysis of group IV chlorides. A laboratory experiment. **Claude H. Yoder.** 382
Hydrolysis of latex paint in dimethyl sulfoxide: An organic laboratory experiment. **Joe A. Vinson.** 877
Hypochlorite oxidations, Thermochemistry of. **M. Jerome Bigelow.** 378

Ideal solutions. **W. A. Oates.** 501
Identification of an unknown ester. An analytical-organic experiment. **Robert L. Grob** and **G. Ronald Husk.** 769
Identification of borosilicate glass, A simple method for the. **Robert F. Drake.** 48
Identification of carboxylic acids. Use of N-methylpiperazine and N-phenylpiperazine. **J. G. Duff, D. K. Yung, R. J. Brenner, B. J. Wilson,** and **W. J. Racz.** 388
Ihde, Aaron J. (P). April cover
Improvements in explaining the periodicity of oxygen chemistry, Recent. **R. T. Sanderson.** 635
Index of refraction, Determination of the. Two simple methods. **J.-A. Deverin** and **J.-J. Salzmann.** 51
Indian training, Correlation of, with American school requirements. **Robert D. Vold** and **Pasupati Mukerjee.** 833
Indian universities, Grading in. **R. C. Kapoor** and **S. P. Rao.** 839
Indirect calorimetry by computer in the general chemistry course. **Dennis DeMattia, Thomas Gruhn,** and **Mel Gorman.** 398
Industrial chemistry for teachers
Tantalum recovery by liquid-liquid extraction. **Guy B. Alexander.** 157
Basic oxygen steelmaking. **Harold E. McGannon.** 293
Economics in the chemical industry. **K. M. Reese**
Part I. 725
Part II. 827
Infrared equipment for teaching. **Paul A. Wilks, Jr.** (Chem. Inst.). A9
Infrared spectra of gases at 300°K and of frozen films at 77°K, The. A physical chemistry experiment. **William A. Guillory.** 681
Infrared spectroscopic studies of hindered internal rotation. A physical chemistry experiment. **A. J. Woodward** and **Neville Jonathan.** 756
Infrared spectroscopy, A superior method of mulling samples for. **Leonard E. Brady.** 301
Infrared spectroscopy, Teflon mixing vial for handling solids for. **Michael J. Clarke** and **David L. Venezky.** 458
Infrared work, A quick-mounting sample holder for. **Leonard E. Brady** and **John Wozny.** 272
Inorganic chemistry
Bonding parameters. 28, 86
Colors of transition metal complexes (CQ). 675
Computing ligand field potentials and energies of *d* orbitals. 799
Cryoscopic measurement of coordination number. 113
Crystal field potentials. 339
Diagrams of relativistic orbitals. 678
Effect of cations on thermal stability of oxyanionic salts. 645
Eighteen electron rule. 811
Explaining the periodicity of O chemistry. 635
Hybrid orbitals in MO theory. 487
Key to point group classification. 27
Kinetics of metal in reactions. 557
Metalation of metallocenes. 44
Molecular symmetry models. 3
Nmr of boron compounds. 54
Notation and classification of close packed structures. 207
Preparation of potassium hexacyanocobaltate(III). 384
Principles of semiconductors. 80
Stable monomeric nitrosyldisulfonate salt. 724
Statistical factor in formation of complexes. 506
Stereochemistry of organometallics. 640
Synthesis and reactions of Co complexes. 508
Tantalum recovery (IC). 157
Turnbull's blue and Prussian blue. 46
Inorganic stereochemistry, Simplified molecular orbital approach to. **R. M. Gavin, Jr.** 413
Inquiry into the origins of hybrid sciences: Astrophysics and biochemistry. **Aaron J. Ihde.** 193
Institutes, Summer, in chemistry for secondary school teachers. 156
Instruction, Dynamic organic laboratory. **Robert B. Smith** (PO). 273, 701(L)

Instrumental organic structural analysis, A one-month course in. **Robert George Landolt.** 661
Instruments, Multipurpose electroanalytical. **Galen W. Ewing** (Chem. Inst.). A717
Integrals, Subroutines for evaluation of, for student-quantum chemistry calculations. **John P. Chesick.** 432
Integrated circuits in the instrumental laboratory. **George A. Scherer.** 399
Integrated physics-chemistry curriculum for science majors, An. **George G. Lowry.** 393
Integration of science teaching, The international congress on the: A summary report. **Edward C. Fuller.** 180
Intensity compensation, source, in atomic fluorescence, An instrument for. **T. C. O'Haver** and **J. D. Winefordner.** 435
Intensive and extensive properties of simple systems, The mathematical behavior of. **Alan J. Brainard.** 104
Interdisciplinary course, An. Biochemistry in the undergraduate curriculum. **Jerry R. Mohrig** and **Nancy M. Tooney.** 33
Intermolecular potential and virial in fluids. **Andrew G. De Rocco.** 365
Internal rotation, hindered, Infrared spectroscopic studies of. A physical chemistry experiment. **A. J. Woodward** and **Neville Jonathan.** 756
International congress on the integration of science teaching: A summary report. **Edward C. Fuller.** 180
Introductory laboratory, A research approach in the. **Lauren R. Wilson.** 447
Iodine atom recombination, Flash photolysis studies of. **J. A. Blake, George Burns,** and **S. K. Chang.** 745
Iodine solutions, basic, The oxidation of hydrazine by: A stoichiometric study. **J. N. Cooper** and **R. W. Ramette.** 872
Iodine (TOPS). A356, A451
Iodoform, Electrolytic preparation of. **K. Helle, J. A. Rijks, L. J. J. Janssen,** and **J. W. Schuyl.** 518
Ion exchange resin, An organic chemistry experiment using an. The resolution of DL-histidine. **Arthur J. Bosch.** 691
Ionic strength, The pK_a of a weak acid as a function of temperature and. An experiment using a *p*H meter. **Jeffrey L. Bada.** 689
Ionic versus covalent bonding. **Dorothy M. Goldish** (TD). A497
Ion pairs and complexes: Free energies, enthalpies, and entropies. **J. E. Prue.** 12
Irradiation, cobalt-60, Nuclear isomers produced by. **Joseph J. Law.** 49
Isomers, Nuclear, produced by cobalt-60 irradiation. **Joseph J. Law.** 49
Isomorphism, One hundred and fifty years of. **Scott I. Morrow.** 580
Isotope dilution analysis, A relative, using samples of infinite thickness. For undergraduate instrumental analysis. **C. B. Johnston, G. Wilson Drake,** and **W. E. Wentworth.** 284
Isotopes, Stable, of the atmosphere. **C. F. Eck.** 706
Isotopic dilution analysis. Cholesterol in gallstones and caffein in tea, cola, and NoDoz. **Addison Ault** and **Raymond Kraig.** 767
Instrumental laboratory, Integrated circuits in the. **George A. Scherer.** 399

January term, The (Symposium)
The chemistry curriculum and the January term. **C. R. Barr** and **J. L. Mackey.** 653
Introductory alchemy: A new course in the chemistry curriculum? **A. Truman Schwartz.** 655
An organic colloquy. **Stuart B. Monroe.** 657
A decade of winter term. **Richard W. Neithamer, Robert J. Hatala,** and **Philip R. Ferguson.** 659
A one-month course in instrumental organic structural analysis. **Robert George Landolt.** 661
Janus in mass-media land, The adventures of. **Irving S. Bengelsdorf.** 543
Jig for making styrofoam molecular models, A. **C. R. Conrad** and **H. E. Bent.** 492

^{40}K, Method to determine the half-life of. **Manuel Navarrete.** 368
^{40}K, The half-life of, by liquid scintillation: Nucleonics experiment. **Ralph Grunewald.** 369
Kinetic experiment for the analytical course, A: Determination of carbonyl mixtures by a differential reaction rate method. **Harry B. Mark** and **Ronald A. Greinke.** 869
Kinetic rate equations. **L. R. Ganesan.** 226
Kinetics
Apparatus for gas reactions. 396
Conversion factors for rate constants. 54
Encounters and slow reactions. 557
Kinetics of fluorescence by liquid scintillation counting. 277
Monte Carlo method of predicting rate of complex reactions. 262
Nmr determination of solvolysis rate. 114
Stirred flow technique. 742
Kinetics, chemical, A computer program for, by titration. **Boris Musulin.** 109
Kinetics, Enzyme. A chemistry projects laboratory. **J. I. Steinfeld.** 232
Kinetics experiment, A. Correlation between ligand field theory and complex dissociation. **G. Brumfitt.** 250
Kinetics, gas, An experiment in. The thermal decomposition of 2,5-dihydrofuran vapor. **Jay A. Rubin** and **Stephen V. Filseth.** 57
Kinetics of condensation polymerization. Preparation of a polyester. **Edward L. McCaffery.** 59
Kinetics of fast brominations. A potentiometric study. **A. E. Burgess** and **J. L. Latham.** 370
Kinetics of proton exchange of trimethylammonium ion by nmr. A laboratory experiment. **Donald E. Leyden** and **W. R. Morgan.** 169
Kinetics of the gas phase pyrolysis of 1,1-dichloroethane. A physical chemistry experiment. **G. R. DeMaré, P. Goldfinger, G. Huybrechts, J. Olbregts,** and **M. Toth.** 684
Kinetics, On chemical. **Charles J. Swartz.** 308
Kinetics, Solution. A chemistry projects laboratory. **J. I. Steinfeld.** 232
King, L. Carroll (P). September cover

Laboratories, freshman chemistry, Closed circuit television in. **D. A. Humphreys** and **R. H. Tomlinson.** 618
Laboratories, teaching, A convenient device for dispensing solid samples in. **George R. Brubaker** and **George T. Behnke.** 318
Laboratory experiments
Activation energy determination. 248
Analysis by induced redox reactions. 246
Analysis of APC tablets. 511
Analysis of cobalt in Co(III) complexes. 440
A quantitative diffusion experiment. 784
Avogadro's number by four methods. 40
Avogadro's number from the volume of a monolayer. 779
Chlorination of 2,3-dimethylbutane. 610
Combustion-gas chromatography experiment. 441
Computerized soda ash experiment. 60
Computer programmed kinetics titration. 109
Conformation of macromolecules. 305
Conversion of sucrose into a carboxylic acid: An undergraduate experiment. 847
Correlation between ligand field theory and complex dissociation. 250
Counter-current distribution. 525
Cryoscopic measurement of coordination number. 113
Decomposition of 2,5-dihydrofuran vapor. 57
Dehydration of 3,3-dimethyl-2-butanol. 849
Determination of distribution coefficient of an acid. 454
Determination of liquid-vapor curve. 532
Determination of the index of refraction. 51
Disc electrophoresis. 41
Effects of Cl^- and temperature on PbCl solubility. 773
16 Experiments used in individual projects lab. 232
Factorial design for Hantzsch pyridine synthesis. 694
Fluorescence experiments. 374
Gel filtration of proteins. 864
Gibbs-Helmholtz relationship. 52
Half-life of ^{40}K by liquid scintillation. 369
Half-life of ^{40}K by use of detection efficiency. 368
Hydrolysis of latex paint. 877
Identification of an unknown ester. 769
Indirect calorimetry by computer. 398
Integrated nmr and organic synthesis. 854
Investigation of KHC_2O_4. 660
IR of gases and frozen films. 681
Isotopic dilution analysis. 767
Kinetics of 1,1-dichloroethane. 684
Kinetics of fast brominations. 370
Kinetics of proton change from nmr. 169
Measurement of second virial. 615
Nitration of 4-nitrophenol and b.p. techniques. 692
Nmr determination of magnetic susceptibility. 167
Nmr determination of optical purity. 351
Nmr determination of solvolysis rate. 114
Nmr study of forms of aluminium isopropoxide. 510
Nuclear isomers from ^{60}Co irradiation. 49
Oxidation states of molybdenum. 505
Photoisomerization of azobenzene using tlc. 117
Physical-organic experiment on dipole moments. 851
*p*K change with temperature and ionic strength. 689
Potentiometric determination of K_{sp}. 857
Practical exam for large section. 120
Preparation and kinetics of a polyester. 59
Preparation of adamantane. 612
Preparation of *p*-anisonitrile. 174
Preparation of potassium hexacyanocobaltate(III). 384
Preparation of sulfanilamide from aniline. 697
Purification of low-melting compounds. 696
Rate and extent of hydrolysis of group IV chlorides. 382
Relative isotope dilution analysis. 284
Resolution of DL-histidine. 691
Saponification of aspirin in DMSO. 245
Self-absorption in nickel. 528
Separation of Co complexes. 47
Series of experiments for small radioisotope generators. 287
Solubility curves of $CaSO_4$ and $SrSO_4$. 252
Stoichiometry of silver chromate and basic copper chromate. 776
Synthesis and reactions of Co complexes. 508
Synthesis of Co compounds. 447
The essential oils. 846
Thermochemistry of hypochlorite oxidations. 378
Tracer experiment on antibiotic synthesis. 866
Turbidimetric determination of chelated calcium. 172
Two Graham's laws experiments. 423
Vapor pressure concepts for general chemistry. 814
Xerography. 530

Laboratory experiments, Statistical evaluation of. **David P. Dingledy** and **Lawrence A. Patrie.** 119
Laboratory heating, unattended, A simple safety device for. **W. J. DeJarlais.** 286
Laboratory instruction, Dynamic organic. **Robert B. Smith** (PO). 273, 701(L)
Laboratory-lecture in organic chemistry, A unique. **Everett J. Nienhouse.** 765
Laboratory, multisectioned engineering chemistry, Practical exam for a. **Alfred M. Rozeiu.** 120
Laboratory-problem for introductory quantum chemistry, An nmr. **Karl F. Kuhlmann** and **Charles L. Braun.** 750
Laboratory techniques, Basic organic, and problem solving. The nitration of 4-nitrophenol. **Robert E. Pearson.** 692
Lassaigne sodium-fusion, A review of techniques in the. **R. P. Gower** and **I. P. Rhodes.** 606
Latex paint in dimethyl sulfoxide, Hydrolysis of: An organic laboratory experiment. **Joe A. Vinson.** 877
Latin American Chemical Congress, Tenth, Report on the. **Robert C. Brasted.** 251
Law, fundamental distribution, Concerning the. **George L. Jones, Jr.** and **Gilbert V. Shelden.** 320
Law of mass action, The. **Steven Berline** and **Clark Bricker.** 499
Lead chloride solubility, The effects of chloride ion and temperature on. A versatile quantitative experiment. **Allen C. West.** 773
Lead, silicon, germanium, and tin compounds, asymmetric, Resolution and stereochemistry of. **Robert Belloli.** 640
Lecture demonstrations
Antigen-antibody system. 868
Catalysis and cleanliness (TD). A547
Diffusion of potassium permanganate. 758
Energy of activation (TD). A547
Fluid-flow simulation of molecular orbitals. 493
Normal modes of vibration. 826
Nuclear and radiochemical phenomena. 665
Lecture demonstrations of polymer structure using polarized light. **F. Rodriguez.** 456
Lecture hall, Instant TV replay in the. **Gregory V. Nelson.** 620
"Lectures, programmed," in freshman chemistry, The use of. **James W. Barnes, John H. Bedenbaugh,** and **Fred W. Brown.** 622
LiAlH/THF. Accident case histories (Safety). A31
Ligand field potentials and relative energies of *d* orbitals, Computing: A simple, general approach. **R. Krishnamurthy** and **Ward B. Schapp.** 799
Ligand field theory and complex dissociation, Correlation between. A kinetics experiment. **G. Brumfitt.** 250
Lighting. Part I of Advanced film-TV production techniques. **W. Robert Barnard** and **George Tressel** (TA) 461
Linear temperature programmer for gas chromatography, An inexpensive. **E. Hautala** and **M. L. Weaver.** 122
Liquid-liquid extraction, Tantalum recovery by. **Guy B. Alexander** (IC). 157
Liquid scintillation counting. Singlet-singlet energy transfer processes. **William Yang** and **Edward K. C. Lee.** 277
Liquid scintillation, The half-life of ^{40}K by: Nucleonics experiment. **Ralph Grunewald.** 369
Liquid scintillation counting of $^{14}CO_2$, Simple. **J. R. Loewenberg** and **Ralph Grunewald.** 170
Liquid systems, Ternary. **Alfred W. Francis** and **Norman O. Smith.** 815
Liquids, volatile, Qualitative transfer device for. **Chester A. Giza.** 289, 701(L)
Liquid-vapor equilibrium curve, A simple method for the determination of a. **John P. Idoux.** 532
Literature, chemical, The application of a course in, to undergraduate research. **Earl Krakower.** 395
Load problem, The. **William H. Cropper** and **Samuel S. Stradling** (PO). 31
Localized and delocalized molecular orbital descriptions of methane. **William A. Bernett.** 746
Lomonosov, Mikhail, and the manufacture of glass and mosaics. **Henry M. Leicester.** 295
Low-melting compounds, Purification of. **Irving Allan Kaye.** 696

Macromolecular model "kits," Disposable. **Isadore Nicholson.** 671
Macromolecules, Conformation of. A physical chemistry experiment. **D. H. Napper.** 305
Madelung constants by direct summation, Calculation of. **Wilbur B. Bridgman.** 592
Magnetic resonance spectra of multispin systems. **P. L. Corio** and **R. C. Hirst.** 345
Malik, J. G. (P). 36, 227, 444, 674
Manuals and handbooks, Safety (Safety)
a. Merck, Sharp and Dohme Research Laboratories. A427
b. Honeywell Corporate Research Center. A487
c. Ohio State University. A597
d. Harvard University. A741
e. Mallinckrodt Chemical Works. A813
f. Monsanto Chemical Co. A881
Markovnikov's Rule and the peroxide effect, A modern look at. **Norbert Isenberg** and **Marcel Grdinic.** 601
Martin, Frank D. (P). 453
Mass action, The law of. **Steven Berline** and **Clark Bricker.** 499
Mass-media land, The adventures of Janus in. **Irving S. Bengelsdorf.** 543
Mass spectrometers. **Galen W. Ewing** (Chem. Inst.)
Part I. A69
Part II. A149
Part III. Commercial spectrometers. A233
Mass spectrometry. A chemistry projects laboratory. **J. I. Steinfeld.** 234
Mathematical behavior of extensive and intensive properties of simple systems, The. **Alan J. Brainard.** 104
Mathematically developed applications for complex kinetic reactions. The stirred flow technique. **Jay E. Taylor.** 742
Math methods
Applications of principle of exponential change. 451
Calculation of nmr shift using particle in a box wave functions. 355
Computer calculation of kinetic data. 109
Conversion of *p*H to [H$^+$]. 22
Conversion tables for rate constants. 54
Derivation of polymer mean weights. 595
Duhamel's theorem applied to mass transport phenomenon. 312
Fundamental distribution law. 320
Integration of kinetic rate equations. 226
Madelung constants by direct summation. 592
Molar susceptibility from nmr. 167
Monte Carlo method of predicting rate of complex reactions. 262
Polynomial method in quantum chemistry. 151
Rationalization of the $\Delta J = \pm 1$ selection rule. 431
Simplified MO approach to stereochemistry. 413
Statistical factor in formation of complexes. 506
Vapor pressure from second law. 107
MCA award recipients, 1969. 379
McGannon, Harold E. (P). 293
Measurement of the coordination number of copper(II), Cryoscopic. **Hebe Coda de Lorenzo, Juan A. Coch Frugoni,** and **Valentin Lopez.** 113
Measuring the second virial coefficients of vapors, A student apparatus for. **Maurice L. Martin** and **Peter J. Dunlop.** 615
Melting point determination, An attachment for semiautomatic. **George Vogel.** 789
Melting points and water solubilities of the alkali halogens. Part III of A bonding parameter. **Jesse Elson.** 86
Membranes, thin, optically-active molecules and, Diffusion cell for. **Avrom A. Blumberg** and **Perlita A. Ilagan.** 238
Mendeleev and Meyer, The priority conflict between. **Johannes W. van Spronsen.** 136
Merck, Sharp and Dohme Research Laboratories. Safety manuals and handbooks (Safety). A487
Metalation of metallocenes. **D. W. Slocum, T. R. Engelmann, C. Ernst, C. A. Jennings, W. Jones, B. Koonsvitsky, J. Lewis,** and **P. Shenkin.** 144
Metal electrodes, spherical, A simple method for preparing. **Thomas F. Sharpe** and **Stuart G. Meibuhr.** 103
Metallic wires, sealing into glass tubing, A convenient method for. **A. K. Vijh** and **R. S. Alwitt.** 121
Methane, Localized and delocalized molecular orbital descriptions of. **William A. Bernett.** 746
Method, The Monte Carlo. Plotting the course of complex reactions. **B. Rabinovitch.** 262
Method to determine the half-life of ^{40}K. **Manuel Navarrete.** 368
n-Methyl nitrosurea improperly stored. Accident case histories (Safety). A31
N-Methylpiperazine and N-phenylpiperazine, Use of. Identification of carboxylic acids. **J. G. Duff, D. K. Yung, R. J. Brenner, B. J. Wilson,** and **W. J. Racz.** 388
Meyer and Mendeleev, The priority conflict between. **Johannes W. van Spronsen.** 136
Mickey, Charles D. (P). 712
Microforms in chemical education. **W. Robert Barnard** (TA). 254
A mnemonic for Maxwell's thermodynamic relations. **Karen Y. Reinheimer** (L). 535, 856(E)
Model "kits," Disposable macromolecular. **Isadore Nicholson.** 671
Model of dendritic structure, A three-dimensional. **Robert C. Olsen.** 496
Models, Molecular. **Wilmon B. Chipman.** 118
Models, Molecular symmetry. **Norman C. Craig.** 23
Models, styrofoam molecular, A jig for making. **C. R. Conrad** and **H. E. Bent.** 492
Models, Wooden, of asymmetric structures. **Martin J. Nye.** 175
Modern look at Markovnikov's Rule and the peroxide effect. **Norbert Isenberg** and **Marcel Grdinic.** 601
Modifications of solution chromatography illustrated with chloroplast pigments. **Harold H. Strain and Joseph Sherma.** 476
Molar quantities, partial, The behavior of, at high dilution. **J. E. Garrod** and **Thelma M. Harrington** (TE). 165
Molecular orbital approach to inorganic stereochemistry, Simplified. **R. M. Gavin, Jr.** 413
Molecular orbital descriptions of methane, Localized and delocalized. **William A. Bernett.** 746
Molecular orbitals, Fluid-flow simulation of. **Roger G. Gymer.** 493
Molecular orbital theory, Hybrid orbitals in. **Irwin Cohen** and **Janet Del Bene.** 487
Molecular polarity, Prediction of, by V.S.E.P.R. theory. **N. A. Daugherty.** 283
Molecular scattering, elastic, Elementary quantum theory of. **C. J. G. Raw** and **A. J. Karrenbrock.** 589
Molecular symmetry models. **Norman C. Craig.** 23

Molecular weight distributions of polymers. **A. Rudin.** 595
Molecules, optically-active, and thin membranes, Diffusion cell for. **Avrom A. Blumberg** and **Perlita A. Ilagan.** 238
MO theory
Application to excited states. 7, 217
Normalization (L). 700
Molybdenum, The oxidation states of. **J. G. Stark.** 505
Monolayer, Determining Avogadro's number from the volume of a. **Cornelius T. Moynihan** and **Harold Goldwhite.** 779
Monomeric nitrosyldisulfonate salt, A very stable. **D. M. L. Goodgame.** 724
Monoprotic or diprotic? **James A. Goldman** (L). 123
Monte Carlo method, The. Plotting the course of complex reactions. **B. Rabinovitch.** 262
Mosaics, glass and, Mikhail Lomonosov and the manufacture of. **Henry M. Leicester.** 295
Mulling samples for infrared spectroscopy, A superior method of. **Leonard E. Brady.** 301
Multispin systems, Magnetic resonance spectra of. **P. L. Corio** and **R. C. Hirst.** 345

Nanoammeter, A versatile, solid state, constant bandwidth recording. **T. C. O'Haver** and **J. D. Winefordner.** 241
Natural philosophy course in physics and chemistry, A. **Harold G. Cassidy** (Symposium on courses for non-science majors). 64
Natural philosophy, Teaching the uncertainty principle and. **D. V. George** (PO). 663
Negative catalyst. **Hakam Singh** and **K. L. Mittal** (L). 185
Nernst glower, Thermal decomposition of water by the use of the. **John O. Glaser** (TD). A497
New England Association of Chemistry Teachers
Seventieth anniversary. 89
Official business. 257
Thirtieth summer conference (P). 257
Thermal analysis. **C. B. Murphy.** 721
Condensation reactions of carbon disulfide. **William O. Foye.** 841
Nickel sources, metallic, The self-absorption of the β-radiation of ^{63}Ni in. A demonstration experiment. **W. J. Gelsema, L. Donk, J. H. T. F. P. v. Enckevort,** and **H. A. Blijleven.** 528
Nitration of 4-nitrophenol, The. Basic organic laboratory techniques and problem solving. **Robert E. Pearson.** 692
Nitrogen controller. **Thomas L. Nunes** (L). 401
Nitrogen dioxide. Accident case histories (Safety). A30
4-Nitrophenol, The nitration of. Basic organic laboratory techniques and problem solving. **Robert E. Pearson.** 692
Nitrosyldisulfonate salt, A very stable monomeric. **D. M. L. Goodgame.** 724
Nmr analysis of water-acetic acid solutions. **G. Dana Brabson.** 754
Nmr and synthetic organic chemistry experiment, An integrated. **George Glaros** and **Norman H. Cromwell.** 854
Nmr determination of optical purity, An. An advanced undergraduate laboratory experiment. **John Jacobus** and **Morton Raban.** 351
Nmr experiment, An. Determination of the rate of solvolysis of benzhydryl bromide. **Ian Horman** and **Michael J. Strauss.** 114
Nmr experiment, An. The two forms of aluminum isopropoxide. **I. J. Worrall.** 510
Nmr, Kinetics of proton exchange of trimethylammonium ion by. A laboratory experiment. **Donald E. Leyden** and **W. R. Morgan.** 169
Nmr laboratory-problem for introductory quantum chemistry, An. **Karl F. Kuhlmann** and **Charles L. Braun.** 750
Nmr of boron compounds. **G. R. Eaton.** 547
Nmr shift, Calculation of, using particle in a box wave functions. An undergraduate exercise. **R. B. Flewwelling** and **W. G. Laidlaw.** 355
Nmr, The determination of paramagnetic susceptibility by. A physical chemistry experiment. **John L. Deutsch** and **Stephen M. Poling.** 167
Noble gases and the periodic table, The. Telling it like it was. **John H. Wolfenden.** 569
N_2O_4 dissociation equilibrium, A computer program for the analysis of the. **Luther E. Erickson.** 383
Nonpolar solvent, Generation of deuterated materials in a. **John D. Worley** and **Daniel A. Garteiz.** 608
Non-science majors, Symposium on courses for. **Robbin C. Anderson,** *Chairman.*
A natural philosophy course in physics and chemistry. **Harold G. Cassidy.** 64
A course designed for the non-scientist. **Charles Keilin.** 66
The PSNS project. **Elizabeth A. Wood.** 69
Nordmann, Joseph B. (P). 379
Normalization of MO's. **Charles E. Hecht** (L). 700
Normal modes of vibration, A lecture demonstration of the. **D. P. Onwood.** 826
Norms, condensed: ACS cooperative examinations. 182
Notation and classification, A system of, for typical close-packed structures. **Shih-Ming Ho** and **Bodie E. Douglas.** 207
Notation for logarithms. **R. W. Missen** (L). 330
Nuclear and radiochemical phenomena, General chemistry demonstrations based on. **Rolfe H. Herber.** 665
Nuclear isomers produced by cobalt-60 irradiation. **Joseph J. Law.** 49
Nuclear magnetic resonance. A chemistry projects laboratory. **J. I. Steinfeld.** 235
Nucleic acids, Progress in our understanding of the optical properties of. **Arthur M. Lesk.** 821
Nucleonics experiment: The half-life of ^{40}K by liquid scintillation. **Ralph Grunewald.** 369

Olefin photochemistry, Selected aspects of. Part I of Photochemistry of organic compounds. **John S. Swenton.** 7
One hundred and fifty years of isomorphism. **Scott I. Morrow.** 580
One-month course in instrumental organic structural analysis, A. **Robert George Landolt.** 661
Optical activity in organic molecules, Criteria for. **Dwight F. Mowery, Jr.** 269, 700(L)
Optically-active molecules and thin membranes, Diffusion cell for. **Avrom A. Blumberg** and **Perlita A. Ilagen.** 238
Optical properties of nucleic acids, Progress in our understanding of the. **Arthur M. Lesk.** 821
Optical purity, An nmr determination of. An advanced undergraduate laboratory experiment. **John Jacobus** and **Morton Raban.** 351
d Orbitals, Computing ligand field potentials and relative energies of: A simple, general approach. **R. Krishnamurthy** and **Ward B. Schaap.** 799
Orbitals, Hybrid, in molecular orbital theory. **Irwin Cohen** and **Janet Del Bene.** 487
Orbitals, molecular, Fluid-flow simulation of. **Roger G. Gymer.** 493
Orbitals, relativistic, Contour diagrams for. **Attila Szabo.** 678

Organic chemistry
Activation energy determination. 248
Analysis of dyes. 522
Analysis of organic substances by liquid scintillation counting. 277
ATP synthesis. 198
Attachment for semiautomatic melting point determination. 789
Composite pK's of cysteine (TE). 239
Condensation reactions of carbon disulfide. 841
Coumarin chemistry. 561, 856(E)
Dehydration of 3,3-dimethyl-2-butanol. 849
Dicyandiamide (cyanoguanidine) (TE). 391
Diffusion cell for optically-active molecules. 238
Electrophilic additions to alkenes (RS). 342
Experiment on conversion of sucrose into an acid. 847
Experiment on essential oils. 846
Experiment on hydrolysis of latex paint. 877
Experiment to identify unknown ester. 769
"Heavier-than-water" extractor. 26
Identification of carboxylic acids. 388
Integrated nmr and synthetic experiment. 854
LMO and DMO's for methane. 746
Markovnikov's Rule and peroxide effect. 601
Metalation of metallocenes. 144
Models of asymmetric structures. 175
Nmr experiment on optical purity. 351
Nmr of multispin systems. 345
Optical properties of nucleic acids. 821
Organic semiconductors. 80
Oxidative coupling of azo compounds. 734
Photoisomerization of azobenzene using tlc. 117
Polarimeter for an overhead projector. 58
Portable steam bath. 236
Preparation of *p*-anisonitrile. 174
Preparation of 2,4,5-trichloro derivative of phenoxyacetic acid (CQ). 229
Product distributions in free radical telomerizations. 299
Proof of constitution and configuration of D-glucose. 55
Purification of low-melting compounds. 696
Raman spectroscopy. A781, A859
Reaction vessel with stirring and atmosphere controls. 314
Reactions on basic alumina. 302
Research project on tertiary ammonium chlorides. 517

a. Merck, Sharp and Dohme research laboratories. A427
b. Honeywell Corporate Research Center. A487, A529
c. Safety handbook, Chemistry Department, Ohio State University. **E. W. Bowerman, P. M. Harris, A. J. Krubsack, E. P. Schram,** and **T. R. Sweet.** A597
d. Harvard University—Responsibilities of individuals in safety organization and Handling and storage of flammable liquids A741
e. Laboratory safety handbook. Mallinckrodt Chemical Works. A813
f. Safety guide, Research Center, Monsanto Chemical Co. A881
Safety shut-off for water-cooled devices. **R. A. Bailey, M. El-Guindy, W. Tangredi,** and **J. A. Walden.** 30
Safety, Thermometer. **Frank Z. Pollara.** 644
Salts, The effect of cations on the thermal decomposition of, with oxyanions. A semiempirical correlation. **Kurt H. Stern.** 645
Sample holder for infrared work, A quick-mounting. **Leonard E. Brady** and **John Wozny.** 272
Samples, mulling, A superior method of, for infrared spectroscopy. **Leonard E. Brady.** 301
Samples, solid, A convenient device for dispensing, in teaching laboratories. **George R. Brubaker** and **George T. Behnke.** 318
Saponification of aspirin in dimethyl sulfoxide. **Joe A. Vinson** and **Edward K. Hocker.** 245
Saturday experiments? **Karl Heumann** (L). 879
Scattering, elastic molecular, Elementary quantum theory of. **C. J. G. Raw** and **A. J. Karrenbrock.** 589
Scavenger, oxygen, Freon-12 as an. **Joseph E. Nelson.** 292
Science and humanity. **Thomas VanOsdall** (L). 184
Science experiment safety in the elementary school. **Charles A. Mann** (Safety). A347
Scintillation counting, Liquid. Singlet-singlet energy transfer processes. **William Yang** and **Edward K. C. Lee.** 277
Scintillation counting of $^{14}CO_2$, Simple liquid. **J. R. Loewenberg** and **Ralph Grunewald.** 171
Scintillation, liquid, The half-life of ^{40}K by: Nucleonics experiment. **Ralph Grunewald.** 369
Seal, A strong and inexpensive glass-to-metal. **John E. Benson** and **Robert L. Garten.** 766

Sealing metallic wires into glass tubing, A convenient method for. **A. K. Vijh** and **R. S. Alwitt.** 121
Sea water, Components of. 443
Sea water, Uranium extraction from. 430
Second law of thermodynamics, Calculating the vapor pressure of water from the. **M. H. Everdell.** 107
$\Delta J = \pm 1$ Selection rule, Rationalization of the, for rotational transitions. **Cornelius T. Moynihan.** 431
Self-absorption of the β-radiation of ^{63}Ni in metallic nickel sources. A demonstration experiment. **W. J. Gelsema, L. Donk, J. H. T. F. P. v. Enckevort,** and **H. A. Blijleven.** 528
Semiautomatic melting point determination, An attachment for. **George Vogel.** 789
Semiconductors, Fundamental principles of. **Edward F. Gurnee.** 80
Semi-micro hot filtration apparatus, A. **Richard W. Kocon.** 516
Seminar, Freshman chemistry. **Paul E. Lensman, Maureen A. March, Lesley Herbst,** and **Noel J. Farrier.** 422
Separatory funnel, A small cylindrical, and rack. **Laurids E. Ross** and **Ruth A. Juvinall.** 322
Shaking apparatus, A simple, inexpensive. **Lawrence J. Burger** and **Richard L. Taber.** 39
Shift, nmr, Calculation of, using particle in a box wave functions. An undergraduate exercise. **R. B. Flewwelling** and **W. G. Laidlaw.** 355
Shrinking universe theory, The incredible. **Ted R. Musgrave.** 546
Short courses, Summer, for college chemistry teachers. 162
Shut-off for water-cooled devices, Safety. **R. A. Bailey, M. El-Guindy, W. Tangredi,** and **J. A. Walden.** 30
Silicon, germanium, tin, and lead compounds, asymmetric, Resolution and stereochemistry of. **Robert Belloli.** 640
Singlet-singlet energy transfer processes, Liquid scintillation counting. **William Yang** and **Edward K. C. Lee.** 277
SI units. **G. Socrates.** 710
Silver chromate, The stoichiometry of, and basic copper chromate. Investigations for the freshman laboratory. **L. H. Kalbus** and **R. H. Petrucci.** 776
Silver-silver bromide electrode, The standard electrode potential of the. **R. L. Venable** and **D. V. Roach** (TE). 741
Slide rule, Chemical safety. **Norman V. Steere** (Safety). A29
Slide rule, Circular, conversion of pH to $[H^+]$. **Larry C. Grimm.** 22
Slow reactions, Encounters and. **Cooper H. Langford.** 557
Smeby, Newell (P). 712
Smith, Otto M. (P). 453
Soda ash experiment for first year college chemistry, A computerized. **Gustav P. Dinga.** 60
Sodium-fusion, Lassaigne, A review of techniques in the. **R. P. Gower** and **I. P. Rhodes.** 606
Solid samples, A convenient device for dispensing, in teaching laboratories. **George R. Brubaker** and **George T. Behnke.** 318
Solid state, constant bandwidth recording nanoammeter, A versatile. **T. C. O'Haver** and **J. D. Winefordner.** 241
Solid state thermoregulator relay, A sensitive. **Frank W. Darrow.** 177
Solids, Apparatus for the addition of suspensions or, to a reaction mixture. **A. de Groot** and **K. Hovius.** 498
Solids, Teflon mixing vial for handling, for infrared spectroscopy. **Michael J. Clarke** and **David L. Venezky.** 458
Solubilities, Water, and melting points of the alkali halogens. Part III of A bonding parameter. **Jesse Elson.** 86
Solubility curves for calcium and strontium sulfates, The. **David Dyrssen, Elena Ivanova,** and **Kerstin Aren.** 252
Solubility, lead chloride, The effects of chloride ion and temperature on. A versatile quantitative experiment. **Allen C. West.** 773
Solubility product constants, Potentiometric determination of: A laboratory experiment. **Stanford L. Tackett.** 857
Solution chromatography, Modifications of, illustrated with chloroplast pigments. **Harold H. Strain** and **Joseph Sherma.** 476
Solutions, Ideal. **W. A. Oates.** 501
Solvent, nonpolar, Generation of deuterated materials in a. **John D. Worley** and **Daniel A. Garteiz.** 608
Solvolysis, Determination of the rate of, of benzhydryl bromide. An nmr experiment. **Ian Horman** and **Michael J. Strauss.** 114
Source intensity compensation in atomic fluorescence, An instrument for. **T. C. O'Haver** and **J. D. Winefordner.** 435
Spectra, Magnetic resonance, of multispin systems. **P. L. Corio** and **R. C. Hirst.** 345
Spectra, The infrared, of gases at 300°K and of frozen films at 77°K. A physical chemistry experiment. **William A. Guillory.** 681
Spectrometers, Mass. **Galen W. Ewing** (Chem. Inst.)
Part I. A69
Part II. A149
Part III. Commercial spectrometers. A233
Spectrometry, Column chromatography and, for separating two cobalt complexes. A laboratory experiment. **Donald L. Schmitt** and **Hans B. Jonassen.** 47
Spectrometry, Mass. A chemistry projects laboratory. **J. I. Steinfeld.** 234
Spectrophotometry. A chemistry projects laboratory. **J. I. Steinfeld.** 233
Spectroscopic analysis of dyes separated by thin layer chromatography, Reflectance. **M. M. Frodyma** and **R. W. Frei.** 522
Spectroscopic studies of hindered internal rotation, Infrared. A physical chemistry experiment. **A. J. Woodward** and **Neville Jonathan.** 756
Spectroscopy
Definition of detection limits. 290
Deuterated materials for nmr. 608
Inexpensive recorder pen. 850
Infrared equipment for teaching (Chem. Inst.). A9
Nmr and organic synthesis experiment. 854
Nmr determination of magnetic susceptibility. 167
Nmr of multispin systems. 345
Nmr determination of optical purity. 351
Nmr determination of solvolysis rate. 114
Nmr experiment on forms of aluminum isopropoxide. 510
Nmr of boron compounds. 547
Recorder pen holder. 50
Sample holder for infrared work. 272
Solubility curves of $CaSO_4$ and $SrSO_4$. 252
Source intensity compensation for fluorescence. 435
Spectra of triplet state. 2
Spectroscopy, infrared, A superior method of mulling samples for. **Leonard E. Brady.** 301
Spectroscopy, infrared, Teflon mixing vial for handling solids for. **Michael J. Clarke** and **David L. Venezky.** 458
Spectroscopy, Raman. **Bernard J. Bulkin** (Chem. Inst.). A781, A859
Spherical metal electrodes, A simple method for preparing. **Thomas F. Sharpe** and **Stuart G. Meibuhr.** 103
Spiral, Teflon enclosed steel, as column packing. **Fred H. Greenberg.** 464
Spontaneous endothermic reactions, A. **Arthur N. Hambly** (TD). A55
Spot plate, Inexpensive. **Warren C. Woelfel.** 56
Stability of ternary and mixed complexes, Statistical factor in the formation and. **V. S. Sharma** and **Jack Schubert.** 506
Stable isotopes of the atmosphere. **C. F. Eck.** 706
States, indistinguishability, and the formula $S = k \ln W$ in thermodynamics. **Jerry Braunstein.** 719
Statistical evaluation of laboratory experiments. **David P. Dingledy** and **Lawrence A. Patrie.** 119
Steam bath, A portable. **D. R. Roswell, M. P. Miller,** and **N. M. Zaczek.** 236
Steel industry, Applied research and development in the. 294
Steelmaking, Basic oxygen. **Harold E. McGannon** (IC). 293
Stencil for glass etching, A convenient. **Ernest C. Alix.** 863
Stereochemistry
Criteria for optical activity in organic molecules. 269, 700(L)
Models of asymmetric structures. 175
Optical properties of nucleic acids. 821
Stereochemistry, inorganic, Simplified molecular orbital approach to. **R. M. Gavin, Jr.** 413
Stereochemistry, Resolution and, of asymmetric silicon, germanium, tin, and lead compounds. **Robert Belloli.** 640
Stirred flow technique, The. Mathematically developed applications for complex kinetic reactions. **Jay E. Taylor.** 742
Stirring and atmosphere controls, Reaction vessel with. **Charles Carraher, Jr.** 314
Stoichiometric study, A: The oxidation of hydrazine by basic iodine solutions. **J. N. Cooper** and **R. W. Ramette.** 872
Stoichiometry of silver chromate and basic copper chromate, the. Investigations for the freshman laboratory. **L. H. Kalbus** and **R. H. Petrucci.** 776
Storage of scientific glassware in polyethylene pellets. **LeRoy W. Haynes** and **Elmer B. Beyerle.** 853
Stored improperly, *n*-Methyl nitrosurea. Accident case histories (Safety). A31
Strontium and calcium sulfates, The solubility curves for. **David Dyrssen, Elena Ivanova,** and **Kerstin Aren.** 252
Structural analysis, A one-month course in instrumental organic. **Robert George Landolt.** 661
Structure of solid aluminum chloride. **M. Jerome Bigelow** (TE). 495
Structure, dendritic, A three-dimensional model of. **Robert C. Olsen.** 496
Structure, polymer, Lecture demonstrations of, using polarized light. **F. Rodriguez.** 456
Structures, asymmetric, Wooden models of. **Martin J. Nye.** 175
Structures, typical close-packed, A system of notation and classification for. **Shih-Ming Ho** and **Bodie E. Douglas.** 207
Student evaluation
Audio aids in examination grading. 327
Condensed norms: ACS cooperative examinations. 182
Correlation of Indian training with American school requirements. 833
Diagnostic-prescriptive essay exams. 323
Examinations: Essay or objective, two views. **P. A. Ongley** and **Clifford C. Houk** (PO). 830
Grading in Indian universities. 839
Placement of freshmen. 160
Survey of advanced placement courses. 229
Styrofoam molecular models, A jig for making. **C. R. Conard** and **H. E. Bent.** 492
Subroutines for evaluation of integrals for student quantum chemistry calculations. **John P. Chesick.** 432
Sublimation apparatus for the undergraduate organic laboratory, A vacuum. **Josef G. Krause.** 790
Sucrose into a carboxylic acid, Conversion of: An undergraduate experiment. **R. M. Carman** and **R. F. Evans.** 847
Sulfanilamide from aniline, Preparation of. An organic chemistry experiment. **Everett C. Hurdis** and **Josephine W. Yang.** 697
Sulfates (TOPS). A33

Sulfates, calcium and strontium, The solubility curves for. **David Dyrssen, Elena Ivanova,** and **Kerstin Aren.** 252
Sulfur dioxide (TOPS). A33
Sulfur dioxide, Oxidizing action of. **Paul M. Lauren** (TD). A55
Sulfur family (TOPS). A33, A107
Sulfur trioxide (TOPS). A33
Summer institutes in chemistry for secondary school teachers. 156
Suspensions or solids to a reaction mixture, Apparatus for the addition of. **A. de** Groot and **K. Hovius.** 498
Symmetry models, Molecular. **Norman C. Craig.** 23
Symposia
Courses for non-science majors. Robbin C. Anderson, *Chairman.* 64
The January term. 653
Synthesis and reactions of cobalt complexes. A laboratory experiment. **Gary L. Olson.** 508
Synthesis, ATP: The current controversy. **David W. Deamer.** 198
Synthesis, organic, Recent developments in the use of organoboranes in. **G. M. L. Cragg.** 794
Synthetic organic chemistry experiment, An integrated nmr and. **George Glaros** and **Norman H. Cromwell.** 854
Systems, multispin, Magnetic resonance spectra of. **P. L. Corio** and **R. C. Hirst.** 345
Systems, simple, The mathematical behavior of extensive and intensive. **Alan J. Brainard.** 104

Table, A periodic, based on potential-pH diagrams. **J. A. Campbell** and **R. A. Whiteker.** 90
Tables of conversion factors for reaction rate constants. **D. D. Drysdale** and **A. C. Lloyd.** 54
Tantalum recovery by liquid-liquid extraction. **Guy B. Alexander** (IC). 157
Teachers, college chemistry, A doctorate program for. **B. R. Siebring** (PO). 163
Teaching aids. **W. Robert Barnard.**
Microforms in chemical education. 254
Films for chemical education. With **Samuel Schrage.** 325
Advanced film-TV production techniques. With **George Tressel**
Part I, lighting. 461
Research summaries for teachers. Organic chemistry: Electrophilic additions to alkenes. **William R. Dolbier, Jr.** 342
Teaching assistants, Training for. Trial classes and TV taping. **John K. Garland.** 621
Teaching, Infrared equipment for. **Paul A. Wilks, Jr.** (Chem. Inst.). A9
Teaching, science, The international congress on the integration of: A summary report. **Edward C. Fuller.** 180
Teaching techniques
Analytical chemistry for honors students. 519
Application of a course in chemical literature to undergraduate research. 395
Audio aids in examination grading. 327
Chemical education—Where to now? 540
Chemistry and the sense of wonder. 38
Computer animation. 334
Computer graded qualitative analysis. 649
Conversion of pHto $[H^+]$. 22
Course designed for the non-scientist. 66
Demonstration of normal vibrational modes. 826
Diagnostic-prescriptive essay exams. 323
Dynamic organic laboratory instruction (PO). 273, 701(L)
Examinations: Essay or objective, two views (PO). 830
Freshman chemistry seminar. 422
Fuel conversion in transport phenomena. 455, 701(L)
Infrared equipment for teaching (Chem. Inst.). A9
Integrated physics-chemistry curriculum. 393
Introducing quantum scattering. 589
Key to point group classification. 27
Lab-lecture in organic chemistry. 765
Microforms in chemical education (TA). 254
Molecular symmetry models. 23
Natural philosophy course in physics and chemistry. 64
Organic laboratory for graduate students (PO). 386
Practical exam for large section. 120
Prediction of molecular polarity by V.S.E.P.R. theory. 283
"Programmed lectures" for freshmen. 622
PSNS project. 69
Quantities of work. 380
Quantum mechanics with a little less mystery. 839
Research approach in the introductory laboratory. 447
Research problem for undergraduates. 427
Statistical evaluation of laboratory experiments. 119
Training assistants. 621
Trends in doctoral chemical education. 71
Truth and aesthetics in chemistry (PO). 577
TV in freshman labs. 618
TV replay in lecture hall. 620
Use of nitration reactions to teach b.p. techniques. 692
Videotaped help sessions in a freshman chemistry program. 392
Why not science? (PO). 484
Teaching the transition elements. **Saul L. Geffner** (L). 329
Teaching the uncertainty principle and natural philosophy. **D. V. George** (PO). 663
Techniques, Basic organic laboratory, and problem solving. The nitration of 4-nitrophenol. **Robert E. Pearson.** 692
Teflon enclosed steel spiral as column packing. **Fred H. Greenberg.** 464
Teflon mixing vial for handling solids for infrared spectroscopy. **Michael J. Clarke** and **David L. Venezky.** 458
Television, Closed circuit, in freshman chemistry laboratories. **D. A. Humphreys** and **R. H. Tomlinson.** 618
Telomerizations, free radical, Product distributions in. **W. G. Lloyd.** 299
Temperature and ionic strength, The pK of a weak acid as a function of. An experiment using a pH meter. **Jeffrey L. Bada.** 689
Temperature equilibration processes, Entropy change for. **C. W. Pyun.** 677
Temperature programmer, An inexpensive linear, for gas chromatography. **E. Hautala** and **M. L. Weaver.** 122
Temperature, The control of. **Maarten Van Swaay** (Chem. Inst.)
Part one. A515
Part two. A565
Temperature, The effects of chloride ion and, on lead chloride solubility. A versatile quantitative experiment. **Allen C. West.** 773
Ternary and mixed complexes, Statistical factor in the formation and stability of. **V. S. Sharma** and **Jack Schubert.** 506
Ternary liquid systems. **Alfred W. Francis** and **Norman O. Smith.** 815
Tertiary ammonium chlorides. A problem in organic qualitative analysis. **G. W. Rausch** and **R. P. Christeck.** 517
Tested demonstrations. Dale Dreisbach, *Editor.*
A spontaneous endothermic reaction. A55
Oxidizing action of sulfur dioxide. A55
Ionic versus covalent bonding. A497
Thermal decomposition of water by the use of the Nernst glower. A497
Catalysis and cleanliness. A547
Energy of activation. A547
Tester for a conductor, A simple. **Shukichi Yamana, Hikaru Yamana,** and **Hajimu Yamana.** 354
Test, potassium flame, Improving the. **Frederick C. Strong, III.** 178
Tetrahydrofuran. Accident case histories (Safety). A31
Textbook errors. William H. Eberhardt, *Editor.*
86. Turnbull's blue and Prussian blue: $KFe(III)[Fe(II)(CN)_6]$. **Lee D. Hansen, William M. Litchman,** and **Guido H. Daub.** 46
87. The behavior of partial molar quantities at high dilution. **J. E. Garrod** and **Thelma M. Herrington.** 165
88. Composite pK's of cysteine. **Samuel J. Rogers.** 239
89. Properties of real gases in the limit of zero pressure. **Yecheskel Rasiel** and **Wade A. Freeman.** 310
90. Dicyandiamide (cyanoguanidine). **Richard F. Stockel.** 391
91. The graphical representation of hydrogen-like wave functions. **Berta Perlmutter-Hayman.** 428
92. The structure of solid aluminum chloride. **M. Jerome Bigelow.** 495
93. Binary phase diagrams. **Alan F. Berndt.** 594
94. The standard electrode potential of the silver-silver bromide electrode. **R. L. Venable** and **D. V. Roach.** 741
Theorem, Duhamel's. **Luis A. Veguilla-Berdecia.** 312

Undergraduate research at Argonne National Laboratory. **Robert A. Kloss.** 672
Undergraduate research, The application of a course in chemical literature to. **Earl Krakower.** 395
Undergraduates, Research problem for. **J. Theodore Peters** and **Maria LaLevic.** 427
Units, SI. **G. Socrates.** 710
Universe theory, The incredible shrinking. **Ted. R. Musgrave.** 546
Uranium extraction from sea water. 430
Urea electrode, A. 309
Vacuum and gas handling system for the freshman laboratory, An inexpensive. **R. W. Zuehlke** and **P. G. Cartier.** 874
Vacuum monitor, Simple. **Edward P. Harbulak** and **Silvester P. Valayil.** 739
Values in chemistry. **W. F. Libby.** 190
Van Swaay, Maarten (P). A515
Vapor-liquid equilibria measurements, Apparatus for. **Alim Ullah.** 820
Vapor pressure concepts, A pseudo-Charles law experiment to teach. **Dean L. Sinclair.** 814
Vapor pressure of water, Calculating the, from the second law of thermodynamics. **M. H. Everdell.** 107
Vapors, second virial coefficients of, A student apparatus for measuring the. **Maurice L. Martin** and **Peter J. Dunlop.** 615
Vessel, Reaction, with stirring and atmosphere controls. **Charles Carraher, Jr.** 314
Vial, Teflon mixing, for handling solids for infrared spectroscopy. **Michael J. Clarke** and **David L. Venezky.** 458
Vibration, A lecture demonstration of the normal modes of. **D. P. Onwood.** 826
Videotaped help sessions in a freshman chemistry program. **Norman V. Duffy** and **Joseph H. Walsh.** 392
Virial coefficients of vapors, second, A student apparatus for measuring the. **Maurice L. Martin** and **Peter J. Dunlop.** 615
Virial, Intermolecular potential and, in fluids. **Andrew G. De Rocco.** 365
Viscosity coefficients of gases, Determination of the. **A. P. Malinauskas, S. J. Whisenhunt, Jr.,** and **J. Q. Searcy.** 781
Volatile liquids, Qualitative transfer device for. **Chester A. Giza.** 289, 701(L)
Volatility, low, Degassing samples of. **Roger E. Rondeau.** 504
Volkswagen versus the hummingbird. **Giorgio Nebbia** (L). 701
V.S.E.P.R. theory, Prediction of molecular polarity by. **N. A. Daugherty.** 283
Water-acetic acid solutions, Nmr analysis of. **G. Dana Brabson.** 754
Water, Calculating the vapor pressure of, from the second law of thermodynamics. **M. H. Everdell.** 107
Water-cooled devices, Safety shut-off for. **R. A. Bailey, M. El-Guindy, W. Tangredi,** and **J. A. Walden.** 30
Water, Thermal decomposition of, by the use of the Nernst glower. **John O. Glaser** (TD). A497
Wave functions, hydrogen-like, The graphical representation of. **Berta Perlmutter-Hayman** (TE). 428
Wave functions, particle in a box, Calculation of nmr shift using. An undergraduate exercise. **R. B. Flewwelling** and **W. G. Laidlaw.** 355
Weak acid, The pK_a of a, as a function of temperature and ionic strength. An experiment using a *p*H meter. **Jeffrey L. Baba.** 689
Why not science? **Evelyn H. Wilson** (PO). 484
Wilks, Paul A., Jr. (P). A9
Willeford, Bennett R., Jr. (P). 556
Winter term, A decade of. **Richard W. Neithamer, Robert J. Hatala,** and **Philip R. Ferguson.** 659
Wires, metallic, A convenient method for sealing into glass tubing. **A. K. Vijh** and **R. S. Alwitt.** 121
Wonder, the sense of, Chemistry and. **Rubin Battino.** 38
Work, Quantities of, in thermodynamic equations. **P. G. Wright.** 380
Xerography, A short experiment in. **H. Keyzer.** 530
X-ray crystallography. A chemistry projects laboratory. **J. I. Steinfeld.** 233
Young, J. A. (P). 36, 227, 444, 674
Zeise's salt. Part I of Historical origins of organometallic chemistry. **John S. Thayer.** 442
Zero pressure, Properties of real gases in the limit of. **Yecheskel Rasiel** and **Wade A. Freeman** (TE). 310
Zone extractor for preparative thick-layer chromatography, A simple, inexpensive. **G. Kan** and **V. Snieckus.** 763
Zone refining organic compounds, Parameters involved in. **I. S. Lippert** and **J. E. Ritter, Jr.** 650

BOOK REVIEWS

TITLES

Absorption spectrometry, Practical hints on (ultraviolet and visible). **J. R. Edisburg,** *Consultant.* A122

Advanced organic chemistry: Reactions, mechanisms and structure. **Jerry March.** 537

Advanced physical chemistry: A survey of modern theoretical principles. **S. M. Blinder.** A894

Advances in infrared group frequencies. **L. J. Bellamy.** A380

Alcohols, Penta- and higher polyhydric, their oxidation products and derivatives, saccharides. Rodd's chemistry of carbon compounds. Volume I: Aliphatic compounds, part F. **S. Coffey,** *Editor.* 2nd ed. A276

Alicyclic compounds, part B. Six- and higher-membered monocyclic compounds: Rodd's chemistry of carbon compounds. Volume II. **S. Coffey,** *Editor.* 2nd ed. A276

Aliphatic compounds, part F. Penta- and higher polyhydric alcohols, their oxidation products and derivatives, saccharides: Rodd's chemistry of carbon compounds. Volume I. **S. Coffey,** *Editor.* 2nd ed. A276

Analysis, chemical, Modern methods of. **R. L. Pecsok** and **L. Donald Shields.** 332

Analysis, industrial chemical, Encyclopedia of. Volume 6, antifreezes to benzaldehyde. **Foster Dee Snell** and **Clifford L. Hilton,** *Editors.* A382

Analysis, Organic, functional group. Theory and development. **George H. Schenk.** 703

Analysis, Quantitative chemical. **Robert B. Fischer** and **Dennis G. Peters.** 3rd ed. A196

Analytical chemistry, Calculations of. **Leicester F. Hamilton, Stephen G. Simpson,** and **David W. Ellis.** 7th ed. 466

Analytical chemistry, Kinetics in. **Harry B. Mark, Jr.** and **Garry A. Rechnitz** (assisted by **Ronald A. Greinke**). 332

Analytical chemistry, photochemistry and, Photoluminescence of solutions with applications to. **C. A. Parker.** A449

Analytical chemistry, Survey of. **Sidney Siggia.** 465

Anderson's essentials of biochemistry. **Gordon H. Pritham.** A46

Applied physical chemistry problems: For chemists and chemical engineers. **A. C. K. Smith.** A894

Atomic debates, The. Brodie and the rejection of the atomic theory. **W. H. Brock,** *Editor.* A631

Atoms, molecules and ions. The wave mechanics of. An introduction for chemistry students. **C. J. H. Schutte.** A447

Basic biological chemistry. **Henry R. Mahler** and **Eugene H. Cordes.** A118

Bestimmung, Elektrochemisches und chemisches verhalten nachweis und, Teil A II, lieferung 2. Gmelins handbuch der anorganischen chemie. 8. Auflage, system nummer 57, nickel. **E. H. E. Pietsch, A. Kotowski,** and the **Gmelin Institute,** *Editors.* A632

Biochemistry, Anderson's essentials of. **Gordon H. Pritham.** A46

Biochemistry, Comprehensive. **Marcel Florkin** and **Elmer H. Stotz,** *Editors.* 466

Biochemistry, Concepts in. **Francis J. Reithel.** A114

Biological chemistry, Basic. **Henry R. Mahler** and **Eugene H. Cordes.** A118

Bio-organic chemistry. Readings from *Scientific American.* **Melvin Calvin** and **Margaret J. Jorgenson,** *Editors.* A284

Boerhaave, Herman: The man and his work. **G. A. Lindeboom** (Foreword by **E. Ashworth Underwood**). A632

Bond, chemical, The electron-repulsion theory of the. **William Fay Luder.** 126

Bonding and structure: A review of fundamental chemistry. **Emil J. Margolis.** 259

Bonding and structure, Chemical. **Ernest Griswold.** 259

Bonding, Molecular orbital theories of, in organic molecules. **Robert L. Flurry, Jr.** A204

Bonds, Properties and reactions of, in organic molecules. **K. F. Reid.** A830

Brodie and the rejection of the atomic theory. The atomic debates. **W. H. Brock,** *Editor.* A631

Calculations of analytical chemistry. **Leicester F. Hamilton, Stephen G. Simpson,** and **David W. Ellis.** 7th ed. 466

Calibration, Precision measurement and: Statistical concepts and procedures. **Harry H. Ku,** *Editor.* A836

Carbon-14. **Vernon F. Raaen, Helen P. Raaen,** and **Gus A. Ropp.** 465

Carbon compounds, Rodd's chemistry of. **S. Coffey,** *Editor.* 2nd ed.
- Volume I: Aliphatic compounds, part F. Penta- and higher-polyhydric alcohols, their oxidation products and derivatives, saccharides. A276
- Volume II: Alicyclic compounds, part B. Six- and higher-membered monocyclic compounds. A276

Carbon, The bond to, Volume 1. Organometallic compounds of the group IV elements. **Alan G. MacDiarmid,** *Editor.* 704

Chelate compounds, metal, Spectroscopy and structure of. **Kazuo Nakamoto** and **Paul J. McCarthy.** A130

CHEM study story, The. **Richard J. Merrill** and **David W. Ridgway** (Foreword by **Glenn T. Seaborg**). A631

Chemical bond, The electron-repulsion theory of the. **William Fay Luder.** 126

Chemical principles: A programmed text, parts I and II. **Olaf Runquist, Clifford J. Creswell,** and **J. Thomas Head.** A443

Chemistry. **Glenn H. Miller.** 880

Chemistry: A brief introduction. **Mark M. Jones, John T. Netterville, David O. Johnston,** and **James L. Wood.** 791

Chemistry: A study of matter. **Alfred B. Garrett, W. T. Lippincott,** and **Frank Henry Verhoek.** 538

Chemistry, Foundations of. **Ernest R. Toon, George L. Ellis,** and **Jacob Brodkin.** 61

Chemistry of the elements, The. **Howard Nechamkin.** 258

Chimie organique. **Donald J. Cram** and **George S. Hammond** (**Philibert l'Écuyer,** *Translator*). 704

Chlor, Auflage, system nummer 6. Gmelins handbuch der anorganischen chemie. 8. Ergänzungsband, teil B, lieferung 1, verbindungen bis chlor und wasserstoff. **E. H. E. Pietsch, A. Kotowski,** and the **Gmelin Institute,** *Editors.* A382

Chlor. Teil A, das element (ausschlieszlich nachweis und bestimmung). Gmelins handbuch der anorganischen chemie. 8. Auflage, system nummer 6. **E. H. E. Pietsch** and the **Gmelin Institute,** *Editors.* A132

Classical scientific papers—chemistry. **David M. Knight,** *Editor.* A52

College chemistry. **Leo H. Spinar.** 188

College chemistry—A survey. **Richard D. Campbell.** 331

College chemistry with qualitative analysis. **William H. Nebergall, Frederic C. Schmidt,** and **Henry F. Holtzclaw, Jr.** 3rd ed. 258

Comprehensive biochemistry. **Marcel Florkin** and **Elmer H. Stotz,** *Editors.* 466

Concepts in biochemistry. **Francis J. Reithel.** A114

Construction and use of atomic and molecular models. **H. Bassow.** 623

Conversions and transfers, energy, Theory of. **Federico Grabiel.** A52

Creative glassblowing. **James E. Hammesfahr** and **Clair L. Stong.** A284

Crystallography, X-ray, Elements of. **Leonid V. Azaroff.** A44

Dangerous properties of industrial materials. **N. Irving Sax.** 3rd ed. A628

Determination, X-ray structure: A practical guide. **George H. Stout** and **Lyle H. Jensen.** A44

Dictionary of organic compounds, fourth supplement, 1968. **R. Stevens,** *Editor.* 4th ed. A631

Die begründung der elektrochemie und entdeckung der ultravioletten strahlen von Johann Wilhelm Ritter. Eine auswahl aus den schriften des romantischen physiker. **Armin Hermann.** A551

Electrochemie und entdeckung der ultravioletten strahlen von Johann Wilhelm Ritter, Die begründung der. Eine auswahl aus den schriften des romantischen physiker. **Armin Hermann.** A551

Electronic spectroscopy, Inorganic. **A. B. P. Lever.** A628

Electronics, Experimental. An introductory laboratory manual for physical scientists. **Richard J. Higgins.** A550

Electron paramagnetism. **Juan A. McMillan.** A44

Electron-repulsion theory of the chemical bond, The. **William Fay Luder.** 126

Elektrochemisches und chemisches verhalten nachweis und bestimmung, Teil A II, lieferung 2. Gmelins handbuch der

anorganischen chemie. 8. Auflage, system nummer 57, nickel. **E. H. E. Pietsch, A. Kotowski,** and the **Gmelin Institute,** *Editors.* A632
Elements of statistical thermodynamics. **Leonard K. Nash.** 62
Elements of X-ray crystallography. **Leonid V. Azaroff.** A44
Encyclopedia of industrial chemical analysis. **Foster Dee Snell** and **Clifford L. Hilton,** *Editors.*
Volume 6. Antifreezes to benzaldehyde. A382
Volume 7. Benzene to brewery products. A760
Encyclopedia, Van Nostrand's scientific. 4th ed. A500
Energy transfers and conversions, Theory of. **Federico Grabiel.** A52
Entdeckung der ultravioletten strahlen von Johann Wilhelm Ritter, Die begründung der elektrochemie und. Eine auswahl aus den schriften des romantischen physiker. **Armin Hermann.** A551
Enzymes, The structure and function of. **Sidney A. Bernhard.** 126
Essential math for the sciences: Algebra, trigonometry, and vectors. **Arthur Beiser.** A899
Europe, continental, Prominent scientists of. **John Turkevich** and **Ludmilla B. Turkevich.** A760
Experimental electronics. [An introductory laboratory manual for physical scientists. **Richard J. Higgins.** A550
Experiments, Laboratory, in organic chemistry. **Jerry R. Mohrig** and **Douglas C. Neckers.** 260

Formulation and stoichiometry. A review of fundamental chemistry. **Emil J. Margolis.** 331
Foundations of college chemistry. **Daniel B. Murphy** and **Viateur Rousseau.** 791
Foundations of chemistry. **Ernest R. Toon, George L. Ellis,** and **Jacob Brodkin.** 61
Foundations of quantum chemistry. **T. E. Peacock.** 702
Fractional solidification, Techniques of: Purification of inorganic and organic materials. **Morris Zief,** *Editor.* A830

Reduction: Techniques and applications in organic synthesis. **Mark N. Rerick, William Reusch,** and **Michael Smith (Robert L. Augustine,** *Editor*). A374
Ritter, Johann Wilhelm, Die begründung der elektrochemie und entdeckung der ultravioletten strahlen von. Eine auswahl aus den schriften des romantischen physiker. **Armin Hermann.** A551
Rodd's chemistry of carbon compounds. **S. Coffey,** *Editor.* 2nd ed.
Volume I: Aliphatic compounds, part F. Penta- and higher-polyhydric alcohols, their oxidation products and derivatives, saccharides. A276
Volume II: Alicyclic compounds, part B. Six- and higher-membered monocyclic compounds. A276

Saccharides, Penta- and higher-polyhydric alcohols, their oxidation products and derivatives. Rodd's chemistry of carbon compounds. Volume I: Aliphatic compounds, part F. **S. Coffey,** *Editor.* 2nd ed. A276

Sauerstoff, System nummer 3. Gmelins handbuch der anorganischen chemie. 8. Auflage. Lieferung 8. **E. H. E. Pietsch, A. Kotowski,** and the **Gmelin Institute,** *Editors.* A836

Science and imagination. Selected papers of Warren Weaver. **Warren Weaver.** A380

Scientific American book, A. Materials. **Dennis Flanagin,** *Editor.* A551

Scientific American, Readings from. Bio-organic chemistry. **Melvin Calvin** and **Margaret J. Jorgenson.** A284

Scientific papers, Classical—chemistry. **David M. Knight,** *Editor.* A52

Scientific progress and human values. **Edward** and **Elizabeth Hutchings,** *Editors.* A132

Seven solid states. **Walter J. Moore.** A126

Solidification, fractional, Techniques of: Purification of inorganic and organic materials. **Morris Zief,** *Editor.* A830

Solid states, Seven. **Walter J. Moore.** A126

Solutions, Photoluminescence of, with applications to photochemistry and analytical chemistry. **C. A. Parker.** A449

Solvents, Nonaqueous. **Ralph A. Zingaro.** A378

Source book in chemistry, 1900–1950. **Henry M. Leicester,** *Editor.* 187

Spectra, high-resolution nmr, Structure of. **P. L. Corio.** A212

Spectrometry, absorption, Practical hints on (ultraviolet and visible). **J. R. Edisbury,** *Consultant.* A122

Spectroscopy and structure of metal chelate compounds. **Kazuo Nakamoto** and **Paul J. McCarthy.** A130

Spectroscopy, Inorganic electronic. **A. B. P. Lever.** A628

Spectroscopy, Plasma. **Geoffrey V. Marr.** 704

Statistical concepts and procedures: Precision measurement and calibration. **Harry H. Ku,** *Editor.* A836

Statistical mechanics, thermodynamics, and kinetics. **O. K. Rice.** A378

Statistical thermodynamics, Elements of. **Leonard K. Nash.** 62

Statistics, Practical, for chemical research. **John D. Hinchen.** 792

Stoichiometry, Formulation and. A review of fundamental chemistry. **Emil J. Margolis.** 331

Structure and function of enzymes, The. **Sidney A. Bernhard.** 126

Structure, Bonding and: A review of fundamental chemistry. **Emil J. Margolis.** 259

Structure, Chemical bonding and. **Ernest Griswold.** 259

Structure of high-resolution nmr spectra. **P. L. Corio.** A212

Structure, Spectroscopy and, of metal chelate compounds. **Kazuo Nakamoto** and **Paul J. McCarthy.** A130

Structure, X-ray, determination: A practical guide. **George H. Stout** and **Lyle H. Jensen.** A44

Survey of analytical chemistry. **Sidney Siggia.** 465

Syntheses, Inorganic, volume 11. **William L. Jolly,** *Editor.* 62

Synthesis, organic, Techniques and applications in: Reduction. **Mark N. Rerick, William Reusch,** and **Michael Smith (Robert L. Augustine,** *Editor*). A374

Synthetic methods of organic chemistry, vol. 22 (1968) yearbook). **W. Theilheimer.** A374

Tantal, 8 Auflage, system nummer 50. Gmelins handbuch der anorganischen chemie. Teil A, lieferung 1, geschichtliches, vorkommen, technologie. **Kurt Swars** and the **Gmelin Institute,** *Editors.* A760

Teaching science, Inquiry techniques for. **William D. Romey.** A630

Terminology, French-English chemical—Terminologie chimique franco-anglaise. **Hans Fromherz** and **Alexander King.** A50

Theoretical principles, A survey of modern: Advanced physical chemistry. **S. M. Blinder.** A894

Theories, Molecular orbital, of bonding in organic molecules. **Robert L. Flurry, Jr.** A204

Theory of energy transfers and conversions. **Federico Grabiel.** A52

Theory, Quantum, of matter. **John C. Slater.** 2nd ed. A447

Theory, The electron-repulsion, of the chemical bond. **William Fay Luder** 126

Thermodynamic aspects of inorganic chemistry, Some. **D. A. Johnson.** A448

Thermodynamics, an introduction. **Rubin Battino** and **Scott E. Wood.** 125

Thermodynamics, statistical, Elements of. **Leonard K. Nash.** 62

Thermodynamics, Statistical mechanics, and kinetics. **O. K. Rice.** A378

Thermometric titrimetry. **H. J. V. Tyrrell** and **A. E. Beezer.** A830

Transfers and conversions, energy, Theory of. **Federico Grabiel.** A52

Transition elements, Halides of the. Halides of the second and third row transition metals. **J. H. Canterford** and **R. Colton.** 624

Transition metal complexes, Reactions of. **J. P. Candlin, K. A. Taylor,** and **D. T. Thompson.** 624

Values, human, Scientific progress and. **Edward** and **Elizabeth Hutchings,** *Editors.* A132

Vanadium, 8. Auflage, system nummer 48. Gmelins handbuch der anorganischen chemie. Teil A, lieferung 2, das element. **E. H. E. Pietsch** and the **Gmelin Institute,** *Editors.* A901

Van Nostrand's scientific encyclopedia. 4th ed. A500

Wave mechanics of atoms, molecules, and ions, The. An introduction for chemistry students. **C. J. H. Schutte.** A447

X-ray crystallography, Elements of. **Leonid V. Azaroff.** A44

X-ray structure determination: A practical guide. **George H. Stout** and **Lyle H. Jensen.** A44
